UNSUSTAINABLE: VIOLENT BLACK CRIME UP TO 86X HIGHER THAN WHITE; ARAB UP TO 23X, LATINO UP TO 15X: GLOBAL STATISTICS ON MURDER, ASSAULT, ROBBERY AND (GANG) RAPE

By: Joel v.d. Reijden | **Date:** June 26, 2017 | **Updated:** Dec. 21, 2025 | CENTER FOR RESPONSIBLE IMMIGRATION

Not meant to attack the individual. First look to the leaders in our own societies: the lilly-white country- and race-traiting politicians and businessmen tied into the globalist network surrounding Bilderberg, Trilateral, Davos, etc.

CONTENTS

Point-summary

1. U.S. black violent crime rates: 2.5 to 86x higher
2. Violent crime rates of European black (up to 32x higher) and Arab (5-23x higher), and Caribbean black (10-20x higher)
3. Violent Latino crime rates: 3-15x higher
4. Notorious eastern Europe less criminal these days than the West; in Paris 158x more robberies than in Bratislava, and 15x more than in Bucharest?
5. Justice in the West covering up real (immigrant) crime numbers

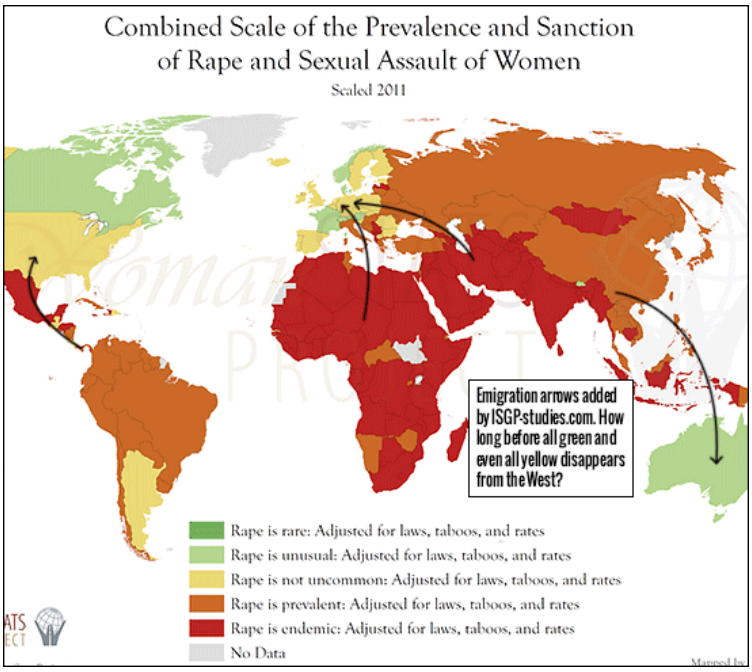
- White guilt warfare manual



"One in four [27.6%] South African men questioned in a survey said they had raped someone. ... [It's] considered a form of male bonding."

> ~ June 18, 2009, BBC, 'South African rape survey shock'. Much of Africa is close to this bad and has even higher numbers than Muslim immigrants.

"White participants in gang rapes are extremely rare [but] the vast majority of victims are white girls. ...
They are seen by their assailants as willing, right because they're white. 'The white meat is available'. ...
Antillean, Surinam and Cape Verdean [blacks] see gang rape as

something macho. ... [Arab] Moroccans still are very clearly overrepresented in swimming pool incidents."

~ December 22, 2001, Volkskrant (major Netherlands newspaper), 'Nog geen twee turven en nu al verdacht van verkrachting; Bij de rechtbank in Rotterdam kijken ze niet vreemd meer op van vermeende verkrachters van 11' ('Not even two turfs tall and already suspected of rape; At the court in Rotterdam they're not surprised anymore at rape suspects of 11').

Update: And yet, seemingly heavily indoctrinated by social media algorithms promoting race mixing, all the hottest white women you try to protect, are dating Arab and black streets kids at 10-20-30-40x the numbers than white guys are dating (hot) black or Arab girls...

"H Ceccato, V., (2014) calculates that over 66% of the [rape] suspects in Stockholm in 2008-2009 were foreign nationals and were characterized by being "ethnically different" [thus excluding westerners], while their average rape victims were characterized by being younger women of Swedish nationality."

~ January 11, 2017, Swedish Democrats party report, 'Vad säger den svenska forskningen om våldtäktsmännens ursprung?' ('What does Swedish research say about the origin of the rapists?'), p. 9. Note: only about 15% of rape convicts in Sweden actually are native Swedes while Sweden "only" has about 15% Third World immigrants.

"0.2 percent of Swedes, excluding immigrant children, were reasonably suspected of rape in 1985-1989. This will be our default value from which we measure overrepresentation: ...

- 23-fold overrepresentation for ... Algeria, Morocco, Tunisia or Libya...
- 20-fold overrepresentation for ... Iraq...
- 18-fold overrepresentation for ... Bulgaria or Romania...
- 16.5-fold overrepresentation for the Africa category excluding North Africa and Uganda [note: not congruent with southern Africa rape numbers] ...
- 10-fold overrepresentation for ... Iran as well as ... Bolivia, Peru and Ecuador..."

> ~ January 11, 2017, Swedish Democrats party report, 'Vad säger den svenska forskningen om våldtäktsmännens ursprung?' ('What does Swedish research say about the origin of the rapists?'), p. 9. Based on: 1996, report of the Swedish National Council for Crime Prevention (BRA), 'Invandrares och invadrares brans brottslighet' ('Crime among immigrants and children of immigrants'), p. 107.
>
> To illustrate the problem: Remember those two crazy kids in high school who were seriously dangerous, especially when they hung out together? Well, now your kid is going to have to deal with 40 or more of those. And teachers are going to have to deal with them. And the police. And social services. And neighbors. That's how thriving societies get ended.

POINT-SUMMARY

U.S. black violent crime rates: 2.5 to 86x higher

Summary of all statistics discussed below (and then some) on black, Arab and Latino crime numbers. We start with U.S. blacks:

1. **Black-on-white "violent crime":** 27x [1] to 42x [2] higher than white-on-black.
2. **Black-on-white murder:** 12x higher than white-on-black. [3]
3. **Black-on-white robbery:** 12x higher than white-on-black. [4]

4. **Black shootings in New York City with victims hit:** 45x [5] to 86x [6] higher than white in terms of suspects, almost all with non-white victims.
5. **Black murders:** 6-11x higher than white in terms of perpetrators. [7]
6. **Black teen murders:** 20x higher than white. [8]
7. **Black early 20s murders:** 17.4x higher than white. [9]
8. **Black 70+ murders:** 5x higher than white. [10]
9. **Black robbery:** 13-15x [11] to 26.8x higher than white. [12]
10. **Black aggravated assault:** 4.8x [13] to 6.5x higher than white. [14]

11. **Black prison rape:** 13x higher than white, with almost all victims being white. Blacks caused 92% of all prison rape in the 1960s, down to 80% by 1980 due to increasing Latino incarceration rates. [15]
12. **Black gang rape, nation-wide:** 5.5x higher than white, which is unusually low compared to Europe, or rape demographics in the U.S.

prison system. [16]

13. **Black rape, all forms, in New York City:** 7.5x higher than white. [17]
14. **Black rape, all forms, nation-wide:** 2.5x higher than white. [18] Again, very much on the low end compared to Europe, or the U.S. prison system.

15. **Police shootings fact #1:** Black and Latino police officers shoot unarmed black suspects at higher rates than white police officers. [19]
16. **Police shootings fact #2:** Police officers are 18.5x more likely to get shot by black criminals than unarmed black suspects are to die at the hand of a police officer. [20]

Violent crime rates of European black (up to 32x higher) and Arab (5-23x higher), and Caribbean black (10-20x higher)

1. **Robberies, shootings and other "street crimes" in London:** 15 to 20x higher for blacks than whites. [21]
2. **Heavy crime in the Netherlands:** 21x higher for (black) Antilleans, 7.6x for Moroccans, and 4.4x for Turks, looking at incarceration rates. [22]
3. **Murder rate on all six black-populated Dutch-Caribbean islands:** Between 10-20x higher than in the Netherlands, which already has many immigrants, also from this area. [23]
4. **Gang rape in London:** 32x higher for blacks. 17x for Arabs. [24]
5. **Rape in the Netherlands:** 14.5x higher than whites for "Other Africa" (i.e. sub-Saharan black) immigrants. 5x higher for Middle Eastern immigrants and 6x higher for Moroccans. These cases also include incest. [25]
6. **"Sexual exploitation" in the Netherlands:** 28x times higher for blacks and Arabs than native whites in a slightly conservative calculation and estimate that there is a *"migration background in almost 90 percent"* of these cases. [26]
7. **Street rape in Norway**: 20x higher for combined black and Arab immigrants than whites, with 70-80% of victims being white women. [27]
8. **Rape suspects in Sweden ("rape" here also includes "sexual assault"):** 23x higher for North Africans than whites, 20x for Iraqis, 18x for Bulgarians and Romanians, 17x for African blacks, and 10x for Iranians. [28]

Violent Latino crime rates: 3-15x higher

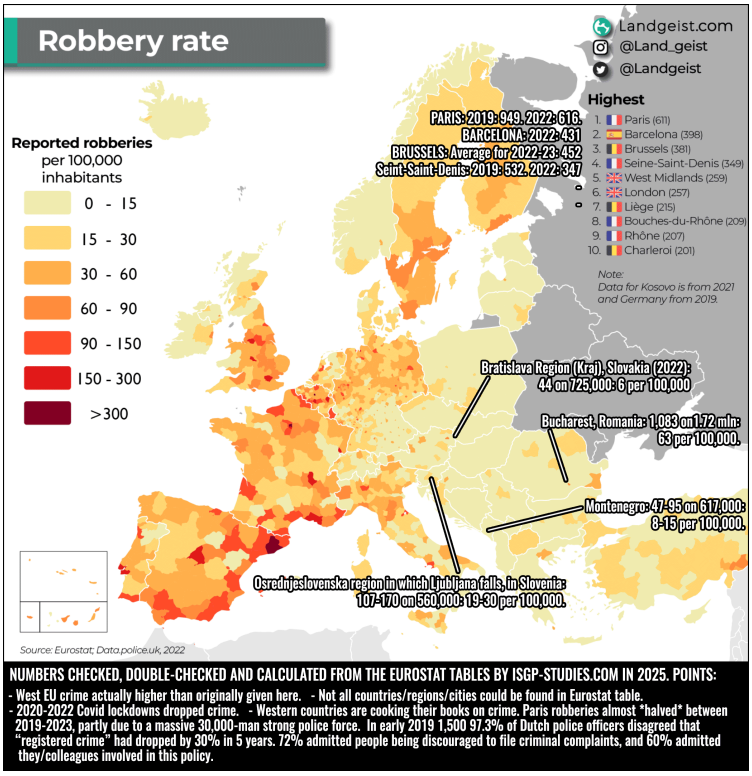
For Latinos, the known numbers, as far as this author has spent time calculating them, are as follows:

1. **Shootings in New York City with victims hit:** 14x [29] to 18x [30] higher than white in terms of suspects, almost all with non-white victims.

2. **U.S. Latino murders:** 2.8-3.4x higher than white for all ages in terms of perpetrators. [31]
3. **U.S. Latino teen murders at ages 15-19:** 7.3x higher than white, but only about one-third of black. [32]
4. **U.S. Latino teen murders at ages 20-24:** 5.7x higher than white, but only about one-third of black. [33]
5. **U.S. Latino-on-white violent crime:** 5.8x higher than white-on-Latino. [34]
6. **Latino rape suspects in Sweden:** 10x higher for Latinos than whites in the 1985-1987 period. [35]
7. **Latino rape, all forms, in New York City:** 4.2x higher than white, compared to 7.5x for black. [36]
8. **Prison rape:** 14% of prison rape compared to 6% for whites in 1980, mainly targeting whites. [37] At this point the author has no data on absolute incarceration numbers for whites, blacks, and Latinos for the 1970s or 1980s.

Notorious eastern Europe less criminal these days than the West: in Paris 158x more robberies than in Bratislava, and 15x more than in Bucharest?

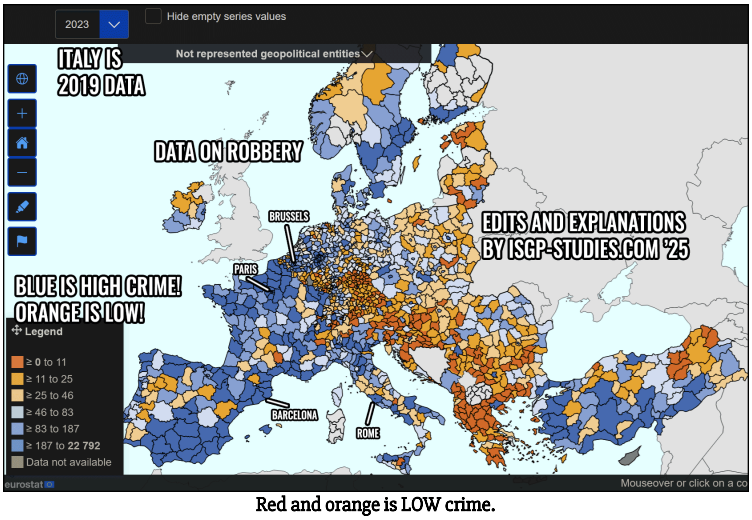
The following chart I ran into through Instagram. I went to the Eurostat database and checked and recalculated the numbers. They're accurate. In fact, the western crime numbers I calculated are a bit higher still:



The reader can also see how I calculated the crime numbers of 4 major city (districts) in eastern Europe. These were the ones I could clearly

identify from the Eurostat crime tables per district. Keep in mind that the UK data in the chart above did not come from Eurostat, as it is not part of this EU network.

The Eurostat map itself also makes it easy to see that western Europe has a lot more crime these days than eastern Europe, forever portrayed in movies as "villain countries". Keep in mind, the orange and yellow are the LOW crime areas. Blue are the HIGh crimes ones. It's very confusing:



Red and orange is LOW crime.

It appears that the number of murders is something western governments do their absolute best to keep down, with high technology, the "cashless society", preventive searches (from school lockers to problem neighborhoods), targeted patrolling, and disrupting drug- and gang-networks all being top priority. But also here the West is not necessarily doing better than a lot of East-European countries. On the left I listed the murder rates per 100,000 from a 2017 chart in a November 2019 article by Latvian Public Media.[38] On the right I double-checked the numbers for 2019 (immediately pre-Covid lockdowns) based on the official number of murders in the country and the population size for that year. In this second list, Eastern Europe is doing better stil. And we also need to keep in mind that, in order, Romania, Bulgaria, Hungary, Slovakia and Croatia all have unwanted, sizeable, low IQ, high crime, Indian-hailing gypsies in their country.

2017 murder rates:

- **Latvia:** 5.6.
- **Lithuania:** 4.0.
- **Estonia:** 2.2.
- **Malta:** 2.0.
- **Belgium:** 1.7.
- **Hungary:** 1.6.
- **Slovakia:** 1.5.
- **Romania:** 1.5.
- **France:** 1.4.

2019 murder rates:

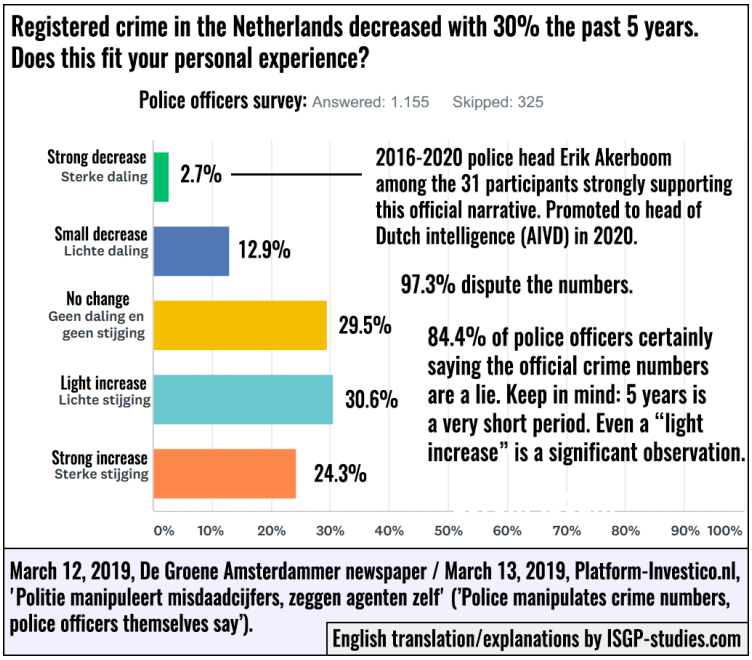
- **Latvia:** 3.0.
- **Lithuania:** 3.0.
- **Estonia:** 2.0.
- **Cyprus:** 1.29.
- **Belgium:** 1.2.
- **France:** 1.2.
- **Bulgaria:** 1.2.
- **Finland:** 1.2.
- **England:** 1.2.

- **Bulgaria:** 1.3.
- **North Ireland:** 1.3.
- **Finland:** 1.3.
- **England:** 1.2.
- **Wales:** 1.2.
- **Sweden:** 1.1.
- **Croatia:** 1.1.
- **Scotland:** 1.1.
- **Denmark:** 1.1.
- **Slovenia:** 0.9.
- **Germany:** 0.9.
- **Ireland:** 0.9.
- **Iceland:** 0.9.
- **Cyprus:** 0.8.
- **Austria:** 0.7.
- **Greece:** 0.7.
- **Netherlands:** n.a.
- **Portugal:** 0.7.
- **Spain:** 0.7.
- **Poland:** 0.7.
- **Czechia:** 0.6
- **Italy:** 0.6.
- **Norway:** 0.5.
- **Switzerland:** 0.5.
- **Luxembourg:** 0.3.
- **Scotland:** 1.2.
- **Sweden:** 1.1.
- **Romania:** 1.1.
- **Wales:** 1.0.
- **North Ireland:** 1.0.
- **Malta:** 1.0.
- **Hungary:** 0.9.
- **Slovakia:** 0.9.
- **Austria:** 0.87.
- **Czechia:** 0.86.
- **Germany:** 0.83.
- **Denmark:** 0.82.
- **Croatia:** 0.80.
- **Greece:** 0.73.
- **Netherlands:** 0.72.
- **Portugal:** 0.71.
- **Spain:** 0.70.
- **Poland:** 0.66.
- **Luxembourg:** 0.63.
- **Iceland:** 0.54.
- **Norway:** 0.54.
- **Switzerland:** 0.54.
- **Italy:** 0.53.
- **Ireland:** 0.44.
- **Slovenia:** 0.42.

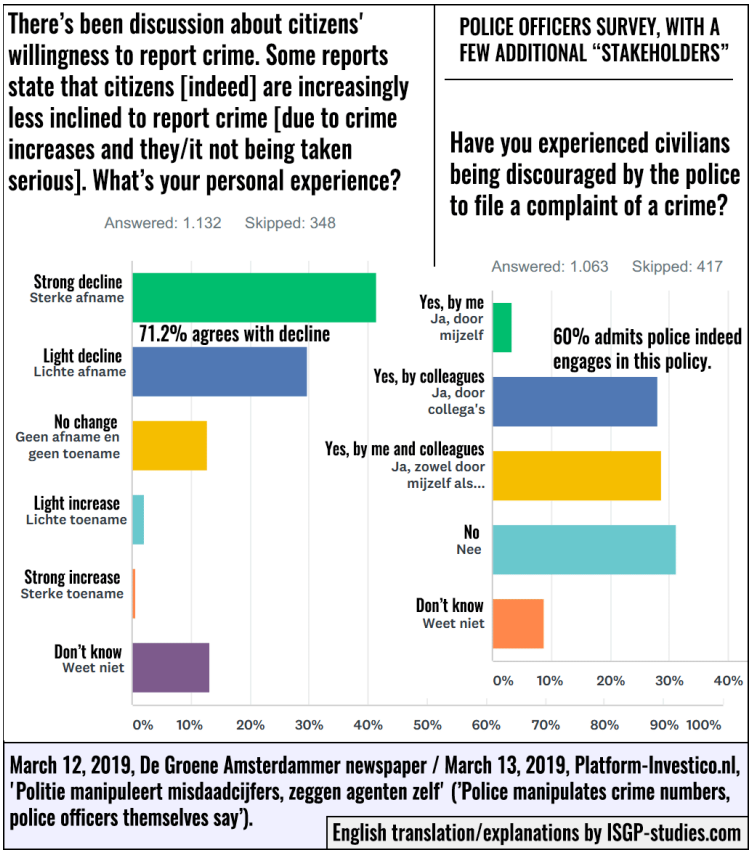
Italy appears to have such a low amount of murders, because from the 1990s authorities cracked down extremely hard on various mafias, pushing them away from murder, and into a lot of financial-type fraud. In 1991 the murder rate still stood at 3.4. By 1994 it already was 1.7. It kept declining from there.[39]

Justice in the West covering up real (immigrant) crime numbers

In a 2019 poll roughly 1,500 Dutch police officers admitted what the population already knew, namely that the decrease of registered crime in the Netherlands is nothing more than a scam, and that the police force indeed discourages citizens from filing crime complaints. At least 84.4% of officers agreed - and really 97.3% - that there never was a 30% reduction in crime between 2013 and 2018, with 55% saying it actually increased over those years[40]:



In addition, 72% of police officers agreed that the people indeed were rapidly developing "complaint fatique", with 60% of the officers acknowleging that they themselves and their colleagues actively were discouraging the population from filing criminal complaints:



It's quite fascinating that the polls about the reasons behind these policies have been left blank, but from an accompanying article we learn that most police officers reported that they simply were following orders.

Tactics to cover up real immigrant crime numbers are discussed in ISGP's White Guilt Warfare article.

INTRO / ORIGINAL ARTICLE

Suppression of ethnic crime numbers

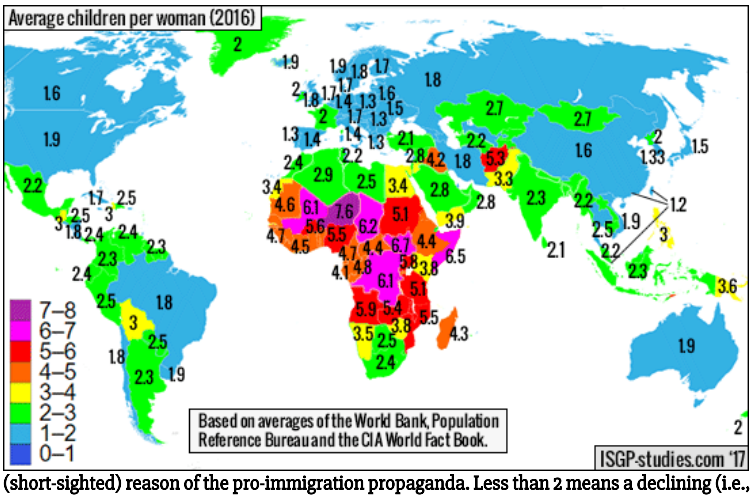
For decades at this point the liberal-globalist establishment of the West, obsessed as it is with Third World immigration, has been suppressing not just race IQ studies, but also crime numbers on ethnic minority groups in the West. In fact, starting around 2014, major "liberal CIA" foundations as Ford, Open Society, Carnegie and Rockefeller, together worth close to $200 billion and discussed in ISGP's "liberal CIA" article series, have even been pouring multi-millions of dollars into the Black Lives Matter movement and hundreds of other pro-immigration groups. The result has been never-ending criticism on "police brutality", "racial profiling", and eventually even full-blown "white guilt".

Blanda Upp / Mix It Up: pro-immigration propaganda music clip in Sweden, at least as crazy as MTV's 2016 *"Hey, white guys"* New Year's Resolutions video. Blanda Upp's lyricist, Michael Lindgren, a.k.a. DJ Trexx, and cohorts also produced pro-EU and anti-Putin comedy/propaganda while working for Sweden's top government broadcasting channel SVT.

One essential and highly curious omission from the media and political establishment is any discussion of black crime numbers. It's not too hard to see why: they're vastly higher than those of the native white population. And not just in the United States, but literally all over the world: in Africa, the Caribbean, other Third World societies, and in Europe. Latino and Arab crime numbers also are strongly elevated, although generally not as much as black ones.

Obviously very high black crime numbers come as zero surprise to the average citizen, certainly not those living in urban areas. It's only the top 1% in western society that wants to stifle any debate on this issue for reasons that are not entirely clear. Suppressing the debates and working towards solutions and keeping the peace would be one thing, but what western elites, especially in the United States since the Obama election and then the Donald Trump presidential campaign have actually been doing is inciting the black population against the white majority. This has

partly been accomplished through thefinancing of endless, irrational protests that have labeled every Trump supporter a "racist", "hater" and "Nazi", but at the same time through the enforcing of political correctness and the hiding of ethnic crime statistics.



The (short-sighted) reason of the pro-immigration propaganda. Less than 2 means a declining (i.e., sick) population and would certainly mean a more influential and higher paid work force due to labor shortages and lower house prices because there's a surplus - things banks and multinationals do not like. It would be much more responsible to propagandize native people's "duty" to bring the birth rate to 2 for the time being.

It must be said, generally it is rather challenging to find detailed, useful numbers on ethnic crime numbers due to this political correctness and outright suppression. Generally, governments and the media:

- don't report ethnic backgrounds when it comes to crime;
- only provide ethnic prison incarceration rates without details on types of offenses;
- report on minority victims, but not on minority offenders.

All these tactics - more than 75 of which have been listed and discussed in ISGP's White Guilt Warfare article - serve to at the very least leave open the "debate" as to whether or not "white racism" is the real cause of heightened prison numbers. And as the problem gets worse and worse due to Third World immigration, we see that it becomes more and more common for governments to all-out scrap the registration of ethnic backgrounds, especially in Europe. Sweden has taken the lead in this. But as said, that is all discussed and sourced in ISGP's White Guilt Warfare article.

January 2007: Extreme hours-long rape-torture-murder of Channon Christian and Christopher Newcom by a group of blacks after the couple returned home from a

In short, this "white guilt" promotion and unrestrained Third World immigration policy of western elites, all of it based on lies and lies of omission, is absolutely unacceptable. So why not put some numbers on the table here regarding black crime numbers in a number of different counties?

Saturday night date.
I learned about the case while putting together the numbers in this article and was, once again, shocked to see the almost total lack of discussion in dominant liberal media outlets as the Washington Post, New York Times and CNN. It's all very minimal and generally delayed by months or years, while you'd think "sensational" material as this would be on TV 24/7.
Compare this to the MASSIVE attention given to the 2015 Charleston church shooting in which 9 blacks were shot by a white activist. Misguided as it is, the brutality of the Christian-Newcom murders was much, much worse, and included a whole group of perpetrators.
The media just don't want to touch black-on-white crimes, including statistics revealing that violent black-on-white crime is 27 times higher than white-on-black. Compare that to the massive attention provided to Black Lives Matter and its millions in financing.

Hopefully these numbers will give people a sense of peace, in the sense that they don't feel they have to allow anymore that the media and political establishment keeps pushing them into a corner by calling any critic of unrestrained immigration a "racist" or "hater". Anybody with even the slightest contact with Third World immigrants, will quickly learn that Africans and Arabs do not offer the slightest bit of cultural enrichment to our society. In fact, looking at their crime numbers, they represent an incredible nuisance and security and existential threat to our civilization.

STATISTICS

Crime numbers on U.S. blacks

- Black males are *"incarcerated at a rate more than 6 times higher than white non-Hispanic males ... 2.6 times higher than Hispanic males"* - and 28 times more than U.S. Asians (Far East Asians keep than number down; not Arabs or Indians). Black women used to be sent 5-6x more often to prison than white women, but there appear to have been unknown policy changes in the mid 2000s, lowering this number to just 3.7x by 2009. [41]

Table 18. Estimated number of inmates held in custody in state or federal prisons or in local jails per 100,000 U.S. residents, by sex, race, and Hispanic origin, June 30, 2000-2009

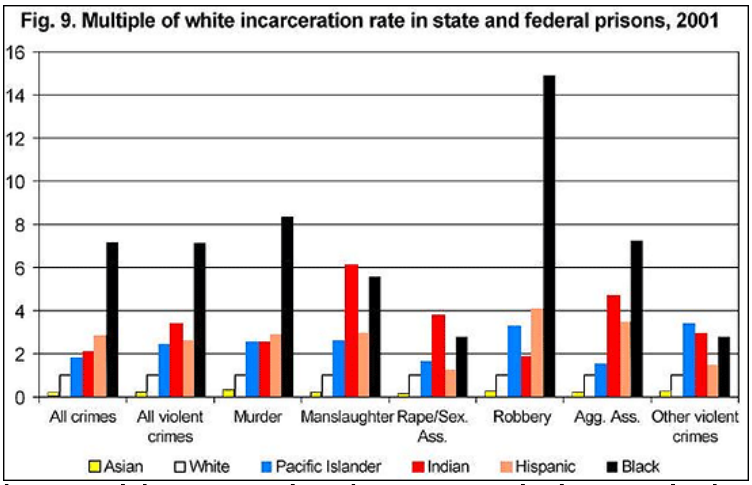
Note: Based on the U.S. resident population estimates for July 1, 2009, by sex, race, Hispanic origin, and age. Detailed categories exclude persons who reported two or more races. All totals include persons under age 18.
[a]Includes American Indians, Alaska Natives, Asians, Native Hawaiians, other Pacific Islanders, and persons identifying two or more races.
[b]Excludes persons of Hispanic or Latino origin.

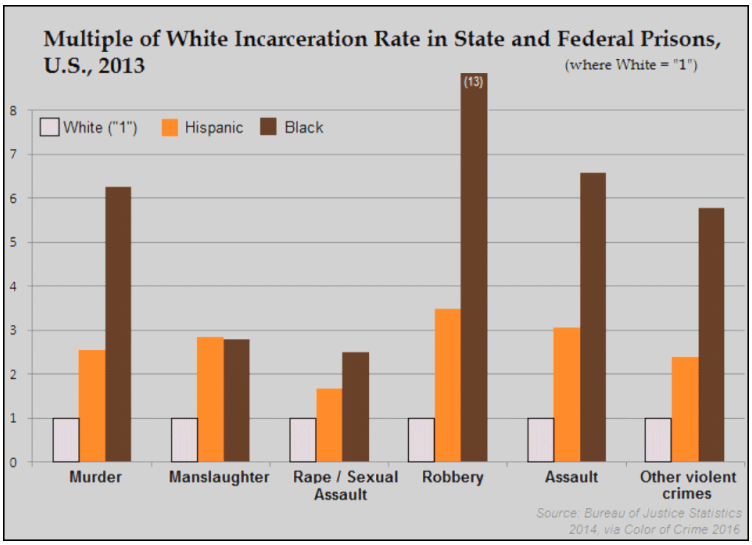
June 2010, Bureau of Justice Statistics, 'Prison Inmates at Midyear 2009– Statistical Tables', p. 21.

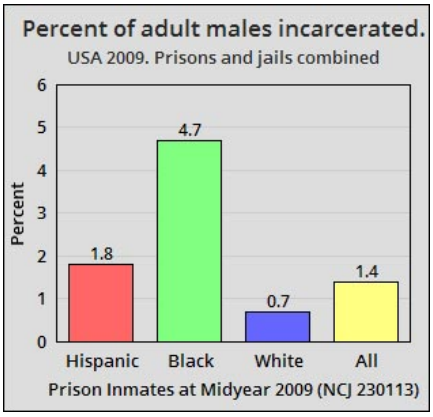
This does not give the entire picture though, considering there are a lot of different crimes. Therefore it is very useful to have a breakdown per crime per race. At that point the picture looks as follows:



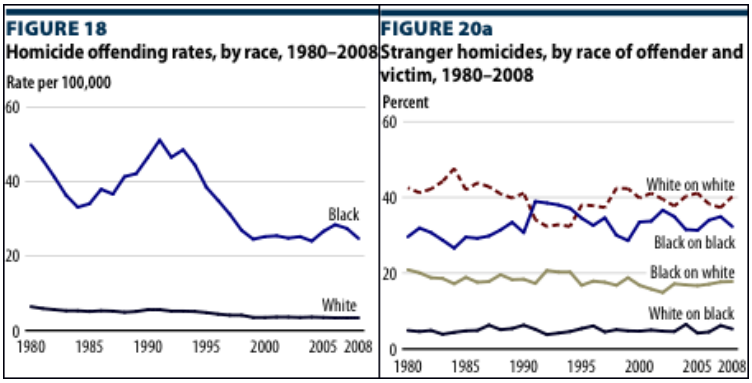
Blacks are particularly overrepresented in violent street crime and underrepresented in things as white collar crime. Also, street rape and gang rape should have been separated from stalker-type rape or incest.

Anno 2024 it turned out to be impossible to find back the above graph in any search engine, to properly document its source. Looking deeper, it appears the reason for this is because it was created by the ultraright American Renaissance magazine for one of its Color of Change reports. Similar to the 2014 graph below, the numbers for 2001 seem to be based on statistics provided by the Bureau of Justice Statistics. The author would have to manually check the Bureau of Justice Statistics numbers to be 100% certain the graphs above above and below are accurate. In time this will be done, maybe. But, looking at other ethnic crime data, at the moment there is no reason to suspect any (major) flaws in them.





- In the 1980-2008 period **blacks committed 6 to 7 times as many murders** on average as whites with black-on-white homicides being over 3 times more common than white-on-black. **During certain periods blacks committed 10 to 11 times as many murders as white people.** [42] The jail statistic above for 2001 indicates 8 times as many, which quite perfectly matches the much heightened historical crime rate among black people.



- Other statistics of the Centers for Disease Control and FBI reveal **black homicide rates between 7 and 11 times higher than white people. Black teens even commit up to 20 times as many murders as white teens.** Latinos/Hispanics commit on average approximately 3.5 times as many murders as whites. [43]

Murders & Murder Rates Per 100,000 by Race; 2007

Black: 8.5x of white.

	Total	Rate
White, non-Hispanic	5,512	2.7
Black, non-Hispanic	8,746	23.1

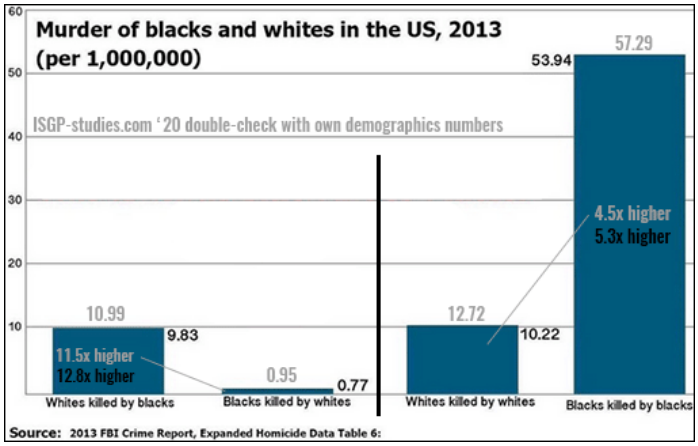
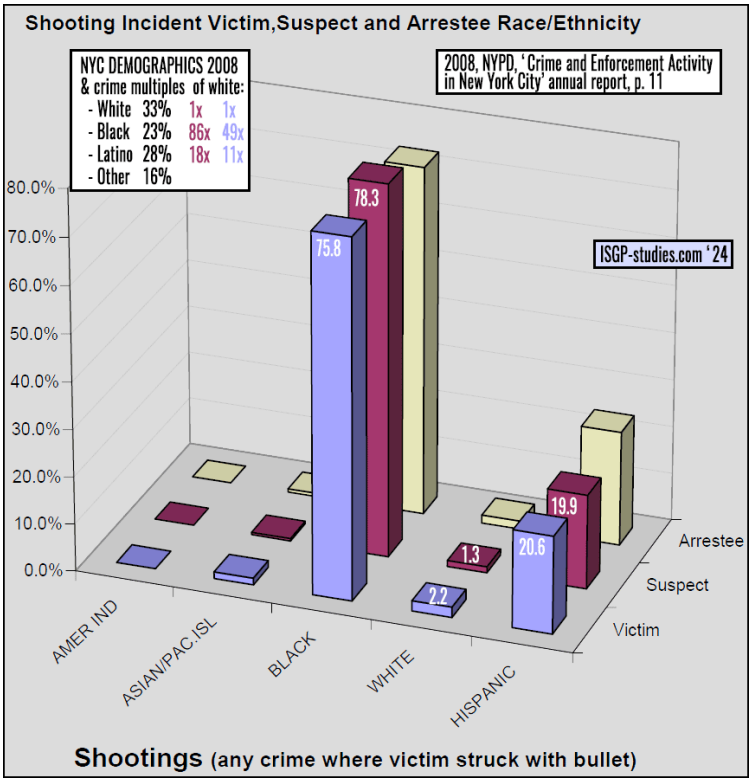
Source: CDC National Vital Statistics System, United States, 2007

Black: 11.2x higher than white; 20.3x at age 15-19.
Hispanic: 3.4x higher than white.

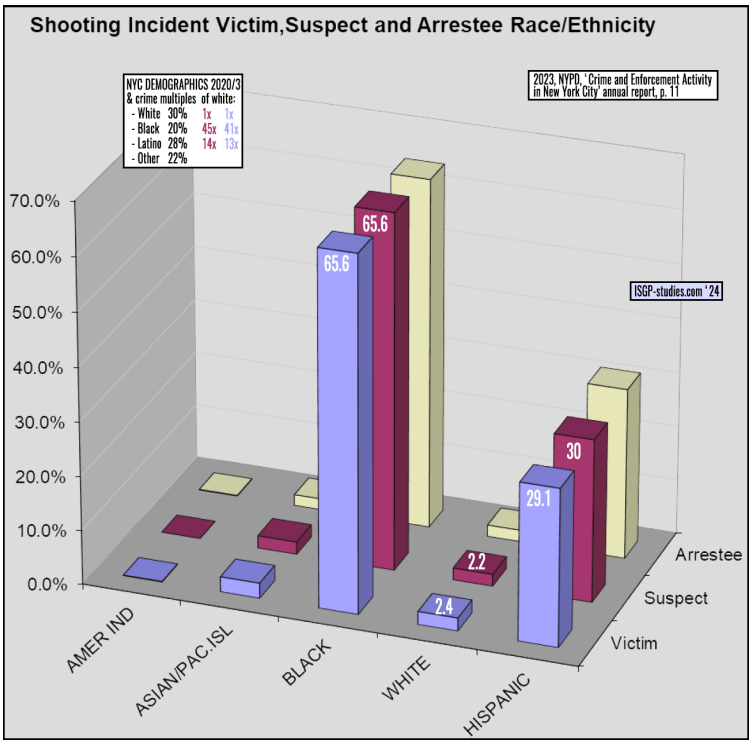
- FBI data from 2013 reveals that black people kill other blacks at a rate 5x higher than white people kill white people. However, the same data shows that **black people kill white people 12x more often than the other way around**.



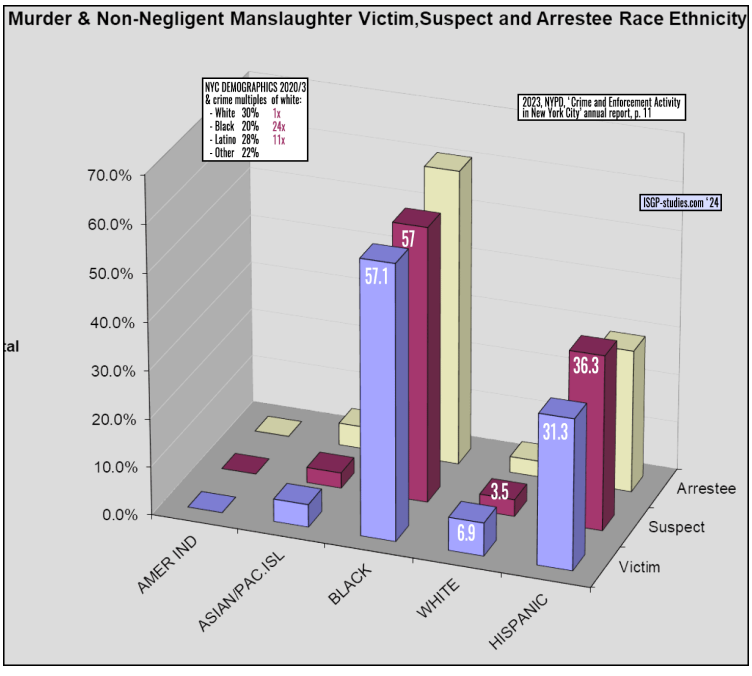
- **Data from the New York Police Department shows that black people in 2008 were 86x more often involved in "shooting incidents", in which at least one person was wounded, than white people. New York City hispanics were 18x more often involved** in such incidents than whites. Granted, New York City involves a lot of white people with money and a lot of black and hispanic people who do not - but still, it's striking to say the least.



Usually the ratios for "shooting incidents" aren't as large as they were in 2008. Whites usually are in the 1.7-2.4% range and blacks in the around 74-75%. As time went by, the white and black percentage in New York City dropped a few percent at the expense of Arab/Asian immigration, with the Latino percentage remaining stable. Despite that, in particular the Latino/hispanic crime in New York City had risen by 2023 with regard to "shooting incidents". **In 2023 Black people "only" were 45x more often involved in shooting incidents than whites versus "only" 14x more for Latinos/hispanics:**

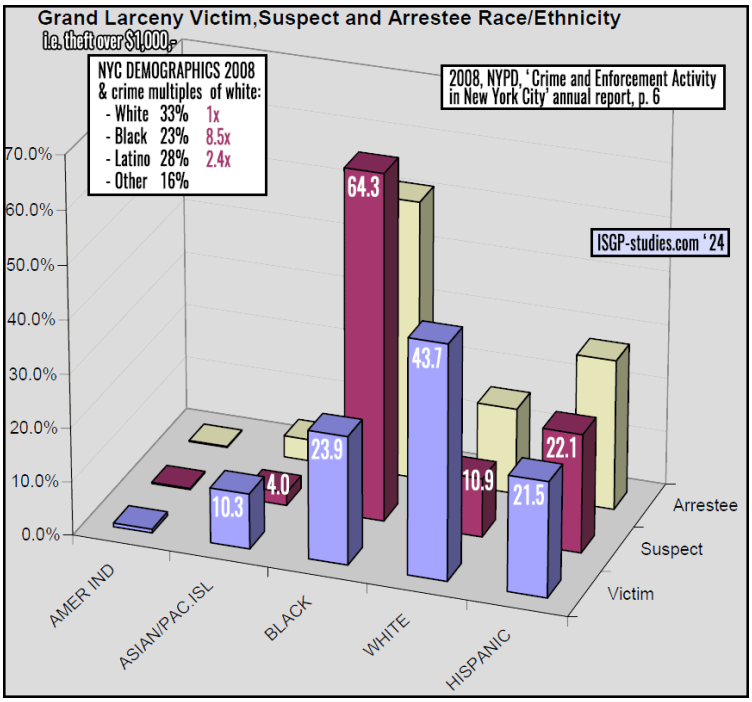


Shooting incidents seem to largely be within race, likely - if this author had to speculate - due to gang warfare. It also seems that if a white person is shot at by black or Latino person, that the result usually is death - because with "murder" and "non negligent manslaughter" all of a sudden there are about double the white victims versus perpetrators. Maybe it's an indication that when you resist a robbery, you have a pretty good chance of dying:

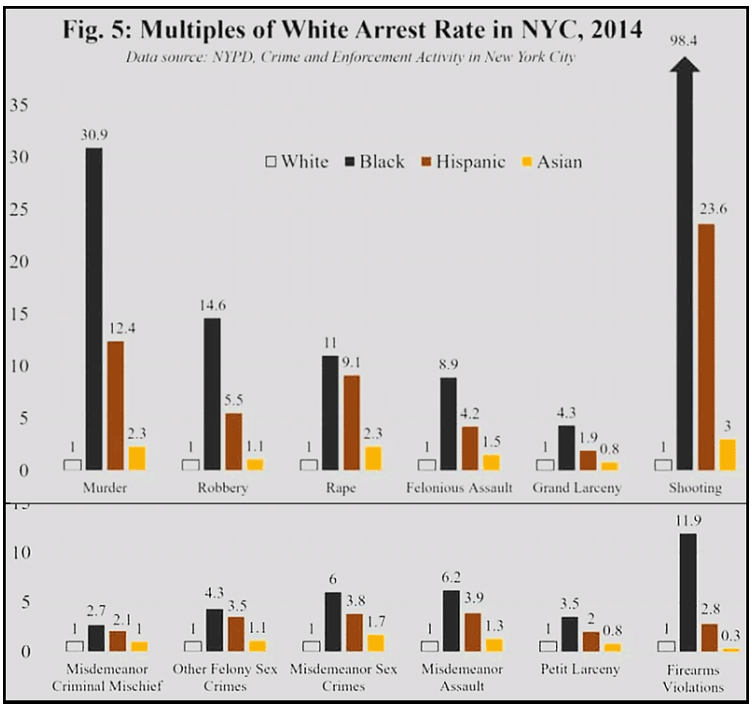


Looking at major robberies of over $1,000 ("grand larcency") in New York City, we in particular find that low crime white and Asian people are being victimized by Latinos and especially blacks. That makes sense, because primarily these groups have money. We also see that a lot of

white people do not necessarily mind a robbery, but are much more hesistant to shoot people, even if only to wound:



In 2014 the ultraright American Renaissance magazine analyzed the New York Police Department's crime numbers for that year. Without double checking any of the numbers, because they seem similar enough to what this author has calculated for other years, the ones the magazine published are as follows:



The trend with black people, as we also see in other places, seems to be that the more violent the crime, the more they are overrepresented compared to whites. That is something that is hidden by almost all

western countries, who very often at most only publish "all crime" ethnic statistics.

For those who want to check some of the above numbers for themselves, here are a number of relevant New York Police Department reports:

- 2008, NYPD, 'Crime and Enforcement Activity Report'.
- 2014, NYPD, 'Crime and Enforcement Activity Report'.
- 2017, NYPD, 'Crime and Enforcement Activity Report'.
- 2023, NYPD, 'Crime and Enforcement Activity Report'.

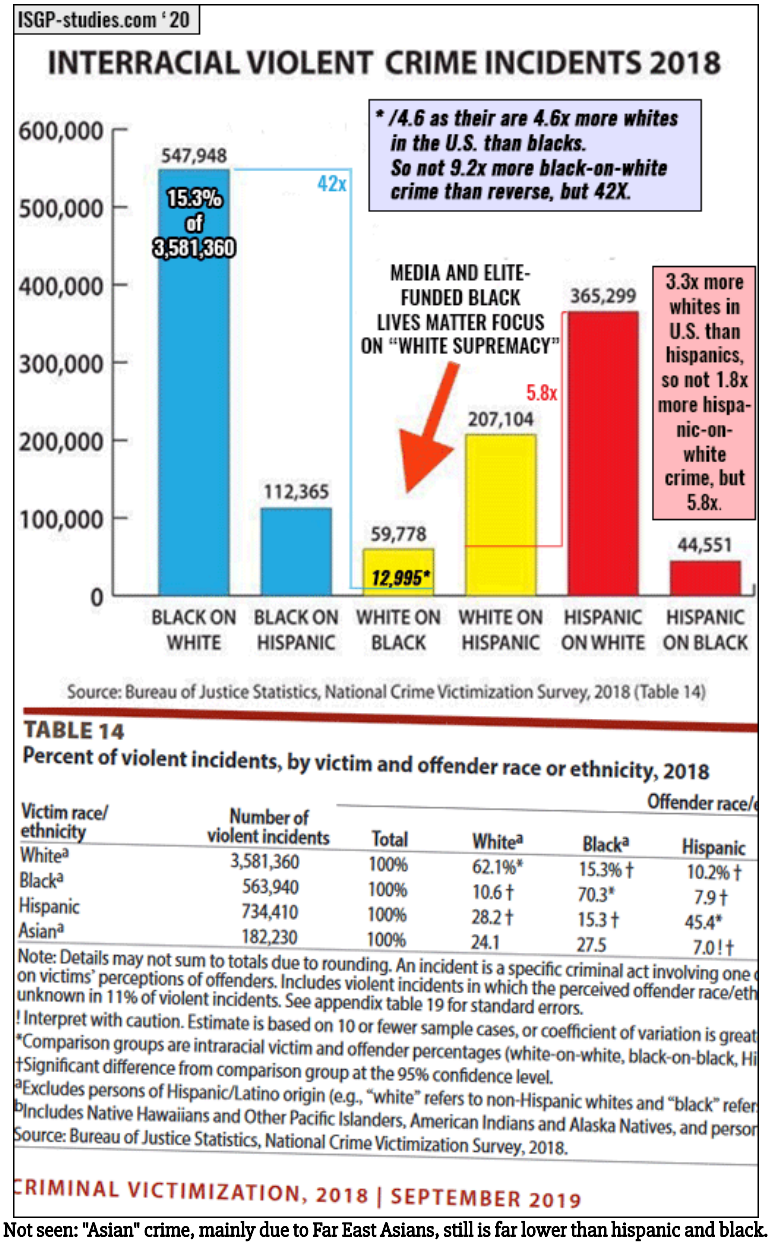
- **Black-on-white robberies are 12 times more common than white-on-black.** [44] 2012-2013 statistics from the Bureau of Justice Statistics, released in 2015, reveal that **blacks are 27 times more likely to commit violent crimes against white people than in reverse**. Black-on-white violent crimes caused 560,600 victims compared to 99,403 vice versa. That's 5.64 times more, but blacks only constitute 13.2% of the population with whites 62.1%, so 5.64 x 4.7 (62.1/13.2) gives us 27 times more violent black-on-white crime than white-on-black. [45]

Distribution of violent victimizations, by race/Hispanic origin of victim and perceive offender, 2012-2013

Race of victim	Annual average number of victimizations		Total		Race of off White/a	Black/a	Hispanic
Total violence		6,484,507	100	%	42.9	22.4	14.8
White/a	*560,600*	4,091,971	100	%	56.0	13.7	11.9
Black/a	*99,403*	955,800	100	%	10.4	62.2	4.7
Hispanic		995,996	100	%	21.7	21.2	38.6
Other/a,b		440,741	100	%	40.3	19.3	10.6

a/Excludes persons of Hispanic or Latino origin.
b/Includes American Indian and Alaskan Native, Asian, Hawaiian, other Pacific Isla two or more races.
Source: Bureau of Justice Statistics, National Crime Victimization Survey, 2012-201

- A 2018 Bureau of Justice Statistics report reveal **42x higher black-on-white violent crime numbers** than in reverse and **6x higher hispanic-on-white violent crime** than in reverse:



Not seen: "Asian" crime, mainly due to Far East Asians, still is far lower than hispanic and black.

- A November 1992 Bureau of Justice Statistics report entitled 'Patterns of Robbery and Burglary in 9 States, 1984-88', on page 1, reads:

> *"The nine States - Alaska, California, Delaware, Minnesota, Missouri, Nebraska, New York, Pennsylvania, and Virginia - voluntarily submitted data under the Offender-Based Transaction Statistics (OBTS) program. ... Most arrested for robbery were black (63%), and most arrested for burglary, white (64%)."*

These numbers do make sense: the more violence and less thinking involved, the more black people tend to be overrepresented. We

have to guess an enormous amount here though, because it's a tedious process to figure out the demographics of each state for the time period given. At the time blacks consisted 12% of the whole U.S. population versus 78% white and 8% Hispanic/Latino. The states in question seem to have a lower black percentage though at the time, so 78 : 12 = 6.5x might well be an underestimation. If we assume 100% - 63% (black robbery) - 8% (estimated Latino and other robbery) that gives us 29% of robbery arrests having been white. That would give us a ratio of 2.17x (63%/29%) for robbery. **6.5 x 2.17 comes down to 14x black overrepresentation in robbery, which very much happens to fall in line with incarceration rates for robbery of 13-15x higher than white in the 2011-2013 period.**

- June 2, 2020, Wall Street Journal, 'The Myth of Systemic Police Racism; Hold officers accountable who use excessive force. But there's no evidence of widespread racial bias.':

  > *"In 2018, the latest year for which such data have been published, African-Americans made up 53% of known homicide offenders in the U.S. and commit about* ***60% of robberies, though they are 13% of the population.****"*

  Without seeing the original data and with the issue of (more criminal) "hispanic whites" / Latinos lobbed in with whites in official statistics, this will again force us to do a lot of estimating. The white population of the U.S. had dropped to 60.5% at this point, with blacks constituting about 13.5%, and Latinos 18%. 60.5/13.5 = 4.5x ratio for population. Now let's say whites committed 20% of robberies. That would be a 3x ratio for the crime. **4.5 x 3 = 13.5x more robbery for blacks than whites. It could be a little lower or higher, but all in all this falls in line with incarceration rates for robbery of 13-15x higher than white in the 2011-2013 period.**

- Looking at Bureau of Justice Statistics data for 2008 (as a general example) [46], we find that **U.S. blacks are 5.5x more likely to be involved in incidents of gang rape**.

  These numbers actually still are quite low compared to black immigrants from Africa and the Caribbean into Europe, which might have a lot to do with the fact that these days rapists, not just child rapists, are despised in the American prison system in particular

and are actively targeted by black and Latino gangs for murder, torture, or at the very least a good beat down.

Table 46. Personal crimes of violence, 2008:

Percent distribution of multiple-offender victimizations, by type of crime and perceived race of offenders

Population demography in 2008:
White: 65%
Black: 13% → **Black / white crime ratio x5**

Type of crime	Number of multiple-offender victimizations	Percent of all multiple-offender victimizations					
		Total	Perceived race of offenders: White	Black	Other	Mixed races	Not known or not available
Crimes of violence	**946,580**	**100 %**	**33.3**	**29.5**	**4.5**	**14.5**	**18.2**
Completed violence	325,080	100 %	27.2	40.1 **7.35x**	6.6 *	16.0	10.1 *
Attempted/threatened violence	621,490	100 %	36.5	23.9 **3.27x**	3.3 *	13.8	22.5

Note: Detail may not add to total shown because of rounding.
Excludes data on persons of "Other" races and persons indicating two or more races.
*Estimate is based on 10 or fewer sample cases.
[a]Includes verbal threats of rape and threats of sexual assault.

Not sure to what extent Hispanics have been labeled "white" in this study.

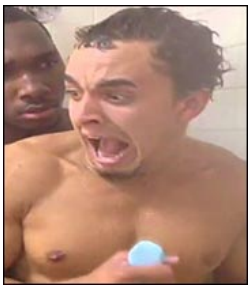
- A 1999 study published in The Howard Journal of Criminal Justice involved an analysis of eight past prison rape studies dating back to 1968, 1976, 1978, 1980, 1982, 1984 and 1990. All of them concluded that **A) blacks commit about 13 times more prison rape than whites; B) almost always target young white males;** C) do so out of racist motivation; and D) generally deny during interviews that their own race is overrepresented. The report concluded:

> *"The issue of blacks exclusively raping whites has been substantially documented since the 1960s, well prior to the overcrowding [and] long before the emergence of prison gangs. ... Whites continue to be raped more severely and frequently and at a disproportionate rate than any other racial or ethnic group. ... The victims are almost always young white prisoners. ...*
>
> *"These sexual 'conquests' serve to establish [black's] status and dominance... Their answers were usually 'now it's their turn'."*[47]

The percentages (but not absolute numbers) for black rape declined as Latinos started entering America's prison system in the 1970s. Already in 1980 it was concluded that **Latinos too rape whites at much higher frequency in prison** and with the same racist motivations. The 1980 study put black rape at 80%, hispanic rape at 14% and white rape at 6%. A 1982 study by different researchers concluded:

> *"It is unusual for either black or Chicano youngsters to be turned out [especially by whites]. The blacks and*

Mexicans-Americans tend to look out for their own and will not turn out one of their own race."[48]



There have been more studies. A 1989 one in which black and white inmates were interviewed aimed to find out *"why African American inmates chose whites as their victims in a sexual assault."* [49] Four more prison studies dating to 2000, 2003, 2005 and 2012 all concluded that ***"black men are disproportionately involved as sexual assault aggressors."*** [50] Meanwhile, some new studies have been trying to shift attention towards "black victims" instead of "black perpetrators", similar to what is being done with murder rates. [51]

Still, the numbers are so obviously stacked against blacks that even modern, extremist, "anti-racism" crusaders educated at Eastern Establishment universities as Princeton concur that the prevailance of black-on-white prison rape is *"at least partially rooted in statistical reality."* This is coming from Eastern Establishment professors screaming and raging about the fact that in April 1981 a judge wouldn't sent a slender-build, apparently gay men to the 90%-black Rikers Island prison, because he *"would be immediately subject to homosexual rape and sodomy and to brutalities from fellow prisoners as make the imagination recoil in horror."*[52]

Arguably the defendant deserved community service and a hefty fine to be paid to a black police officer he allowed his German Shepherd to attack. Agree or disagree, the point is, these numbers roughly correspond with those found out in society - and racial segragation in prison can prevent an incredible amount of misery, particularly for native white inmates.

- Turns out, **black people consider their own ethnic group more racist against white people** than white people consider themselves racist against black people. [53]

June 6, 2016: 16-year-old wannabe gangbanger Kane Millsaps put on brass knuckles and violently KO-ed an unsuspecting 12-year-old white kid on a skateboard in front of his female friends, and then continued to crush all his teeth while he was KO. The national media was silent.

- In addition, there's evidence that in American ghettos there's quite a bit of hate against whites, with random attacks happening largely or purely based on skin color. [54] It has even become a trend for the New Black Panther Party and various affiliates to call for violence against

whites, including the need to *"kill some crackers [and] kill some of their babies."*[55]

- June 2, 2020, Wall Street Journal, 'The Myth of Systemic Police Racism; Hold officers accountable who use excessive force. But there's no evidence of widespread racial bias.':

  > *"In 2018 there were 7,407 black homicide victims. Assuming a comparable number of victims last year, those nine unarmed black victims of police shootings represent 0.1% of all African-Americans killed in 2019. By contrast,* ***a police officer is 18.5 times more likely to be killed by a black male than an unarmed black male is to be killed by a police officer****. ...*
  >
  > *"A 2015 Justice Department analysis of the Philadelphia Police Department found that* ***white police officers were less likely than black or Hispanic officers to shoot unarmed black suspects****. Research by Harvard economist Roland G. Fryer Jr. also found no evidence of racial discrimination in shootings. ...*
  >
  > *"On Memorial Day weekend in Chicago alone, 10 African-Americans were killed in drive-by shootings. ... Police shootings are not the reason that* ***blacks die of homicide at eight times the rate of whites and Hispanics combined****; criminal violence is."*

- The following compilation shows the 2015 study in question. Set up after the Black Lives Matter controversy, the study revealed that **black police officers are twice as often involved in incorrectly shooting black suspects than their white colleagues**, and that **Hispanic police officers tend to do that 3x more often**. In other words, there indeed is no evidence of any "white supremacy" among white police officers.

COLLABORATIVE REFORM INITIATIVE: An Assessment of Deadly Force in the Philadelphia Police Department
U.S. DOJ: COPS and the Center for Naval Analyses (CNA) - 2015 report

Table 8. Officer race, suspect race, and threat perception failures

	Black suspects TPF/OIS (percent)	Hispanic suspects TPF/OIS (percent)	White suspects TPF/OIS (percent)	Asian suspects TPF/OIS (percent)	Total TPF/OIS (percent)
White officers	10/146 (6.8)	0/26 (0.0)	0/17 (0.0)	0/2 (0.0)	**10/191 (5.2)**
Black officers	10/88 (11.4)	1/3 (33.3)	0/9 (0.0)	1/3 (33.3)	**12/103 (11.6)**
Hispanic officers	3/18 (16.7)	1/3 (33.3)	0/1 (0.0)	–	**4/22 (18.2)**
Asian officers	–	–	–	–	–

TPF = Threat Perception Failure. IOS = Officer-Involved Shootings.

"Protest movements have spread across the country with profound mantras such as "Black Lives Matter"...

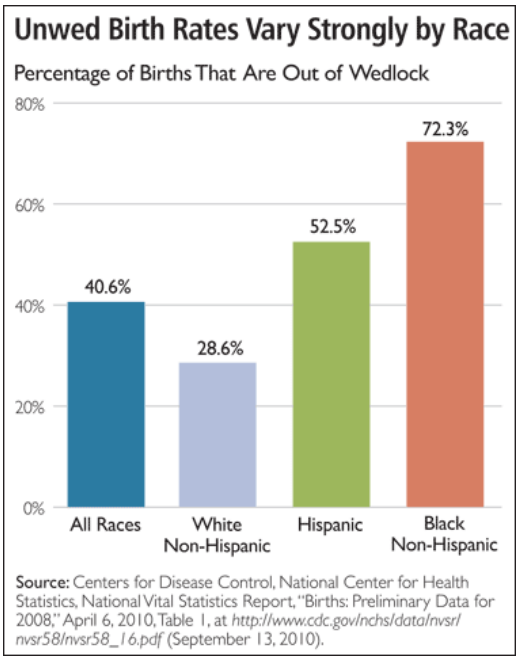
"Black, White, and Hispanic officers EACH had relatively high rates of TPFs when the suspect was Black. ... OISs would generally support the notion that unconscious bias plays a role in deadly force decision making and TPFs. However, we stress that this is notional [because black officers are more often involved in incorrectly shooting blacks than white officers and] suspects in officer-involved shootings were overwhelmingly Black [and that without being corrected for demographics]."

REPORT FAILS TO MENTION: "NO EVIDENCE FOR WHITE SUPREMACY IN OIS. TO THE CONTRARY."

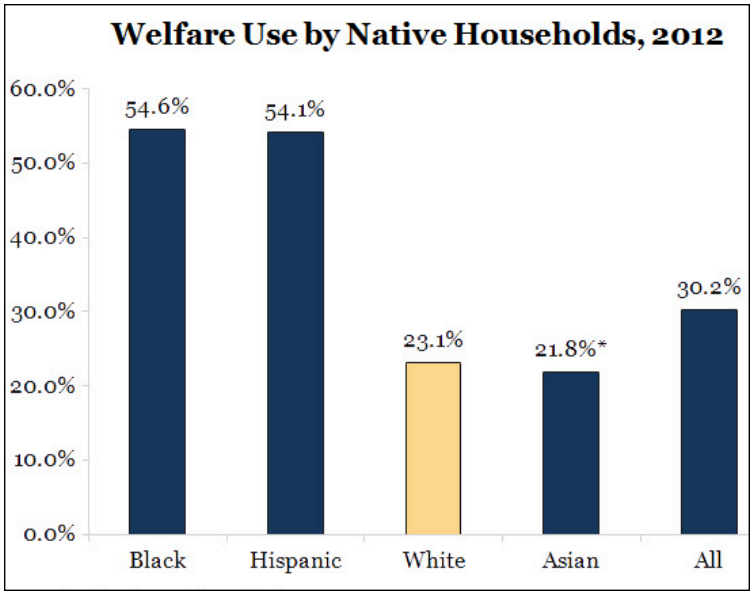
ISGP-studies.com '20

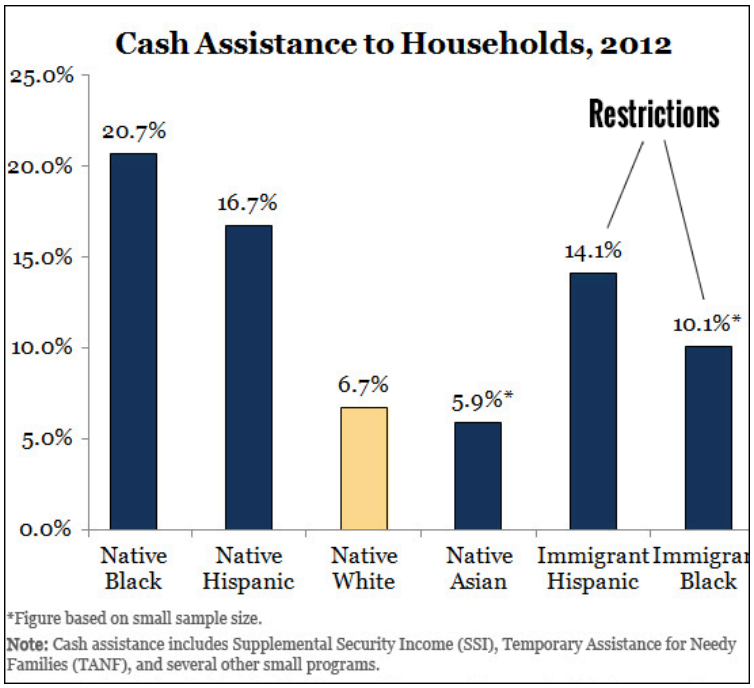
- An August 17, 2016 look at the Los Angeles Police Department's complete Most Wanted List reveals 220 individuals. There are literally only 4 Caucasians on the list compared to 26 blacks, about 175 Hispanics and a few remaining Asians.

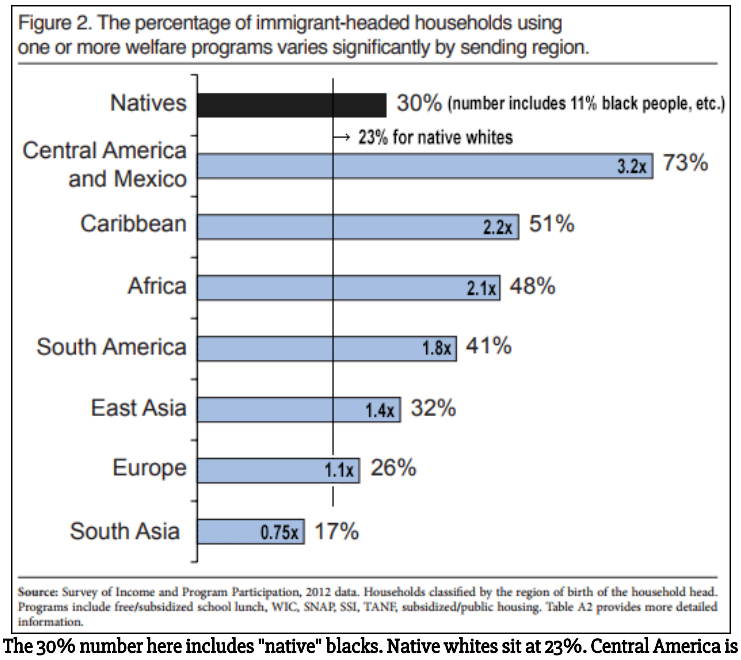
- Another interesting statistic, albeit of less importance, is that blacks have the highest percentage of children born out of wedlock: 72%. Hispanics follow at 53% and whites at 29%. The average in liberal north-western Europe today is about 45%, with Scandinavia having the highest average of about 52%. The remote Icelanders take second place after American blacks at 66%. (click here for European statistics)



- Looking at the latest-available welfare numbers from the Center for Immigration Studies, 55% of black households receive welfare and 23% of white households. Thus **black households receive 2.4x more often welware than white ones. Cash assistance to black households is 3.1x higher than white ones.** [56]







The 30% number here includes "native" blacks. Native whites sit at 23%. Central America is primarily Native Indian while South American countries as Argentina, Chile and Uruguay are over 90% Spanish white.

Apart from black households, it appears that immigrants of Central America in particular are taxing the United States' already questionable welfare system. It would be nice to have additional numbers on welfare, mainly involving long-term and short-term beneficiaries. In the Netherlands, for example, only about 4% of native white people are long-term recipients while another relatively small percentage involve short-term ones. Compare this to Dutch Somalians who are 70% long-term unemployed and maybe another 10-20% that is short-term unemployed. It appears similarly high numbers go for other (Sub-Saharan) African immigrations.

It would also be interesting to have regional data, especially on America's deep south where not only the highest black population numbers are, but also the most amount unemployment, the lowest IQs (less interbreeding with white people), and, as a result, the greatest amount of division. In addition, because crime numbers among U.S. blacks are so high, especially for robberies, it would also be interesting to see how many estimated blacks (and whites) are not on welfare due to criminal practices.

Non-racist but publicly overly outspoken Gainesville High School students who caused major controversy in Feb. 2012. According to the primary girl on the left, her family *"owned half the railroads and half of Cuba [with one member being] the*

These last statistics were actually added in response to me remembering a February 2012 YouTube clip of two female students of Gainesville High School in Jacksonville, Florida. They uploaded a rant about the black people of their high school not being able to talk proper English, seldom graduating, mismanaging money by spending it on

expensive name-brand clothes and other non-essential bling, committing most of the crime, and having no aspirations besides getting on welfare or working at McDonald's.

mayor of Havana." Apparently some influential families can never stop making waves in one form or another. The parents of her best friend, Marcel, a black guy, *"are both surgeons [and] is from a wealthy family."*
Interesting contrast. Over here, parents of such affluence would never send their kids to immigrant-dominated schools.

Blacks, and the occasional Eminem fan, swarmed their YouTube video en masse to down-vote, insult their intelligence, and threaten that *"they should be taught a lesson"*. In any case, a handful of local newspapers, as well as first-rate "liberal CIA" outlets as the Huffington Post and The Young Turks, joined the lynching party, labeling these girls "racist" without any kind of rational debate. As a result of these girls being hung high and dry at a ratio of at least 5 to 1, they had to fear for their lives to the point of having to go into hiding, were expelled from school, and were forced to publicly apologize.

These girls weren't racist at all. The primary one talked about her best friend, Marcel, a black guy (including another hilarious but "did she really just say that" remark: *"His skin color, if it was any darker you wouldn't be able to find him."*), while the other girl mentioned a Jamaican friend. Both these black kids also made fun of the many "niggers" amongst their race. This is just realism and how these kids talk amongst each other. The media always exploits this issue by pretending it's not possible or logical to have opposing opinions about race and individuals within that race. It's one of countless tactics used to sell us the multicultural non-society.

So, should these girls have made their video the way that they did? Maybe, maybe not. Their honesty certainly is very refreshing, considering the majority of whites have these opinions, certainly the ones who have been in contact with black ghettos and Third World immigration - whether they like to admit it or not. But factual discussions involving statistics really would be better for public discourse. It's better at keeping the peace and it makes it infinitely harder for the media to attack the messenger. At that point, linking to you also means linking to facts establishments prefer to suppress. Thus... I invite the entire world to try and debunk this article or attack me as a person. Let's see if you can make me back down and apologize.

Crime numbers on U.K. blacks

- A study of The Independent from 2006 to 2009 revealed that roughly 72% of gang rape convicts in London in this period were black or mixed, 14% were white, and 13% were Arab. [57]

  At that point the white population in London stood at about 70%, the black population at about 11% and the Arab nationalities listed at no more than 4%.

  Based on these numbers, and from the original source, it can be concluded that **London blacks are roughly 32x more often involved in gang rape incidents than whites. And Arabs at least 17x.**

  Of course, reports starting in 2014 of a "Muslim rape crisis" could have easily been predicted. Also keep in mind that many Africans pouring into Europe, such as the Somalians, also are Muslim. Sub-Sahara Africa has a HUGE institutional rape problem while Arabs tend to be highly sexually frustrated due to their religion.

- Data for 2009-2010 of the Metropolitan Police reveals that 54% of "street crimes" (theft, fighting and such), 59% of robberies and 67% of gun crimes in London were perpetrated by blacks. At that point in time about 12% of London was black or mixed and 69% white, a ratio of 1 to 5.75. If you're estimating an 18% white crime rate with all three listed offenses, you're looking at **black crime levels in London - involving serious crime - that are 15 to 20x higher than white.**

  From that perspective, the statement of the media that *"police figures also show that black men are twice as likely to be victims"* is suspect, because did they correct these numbers with the demographic percentages? If not, this statement would come down to a lie. And how much of this number involves black-on-black crime? As usual, the public is kept in the dark.

  Media reports on these numbers also noted that black women also are strongly overrepresented in violent crime.

  Also interesting is the remark that *"on sex offences, black men made*

up 32 per cent of male suspects proceeded against, and white men 49 per cent." Even when corrected for demographic percentages, that number appears to be a little high for white people. Maybe they should have singled out "gang rape" instead of the very vague term "sex offences".

Also expected is the citation of an official who explains that *"Britain's long history of racism and imperialism"* is responsible for the high crime numbers among London blacks. [58]

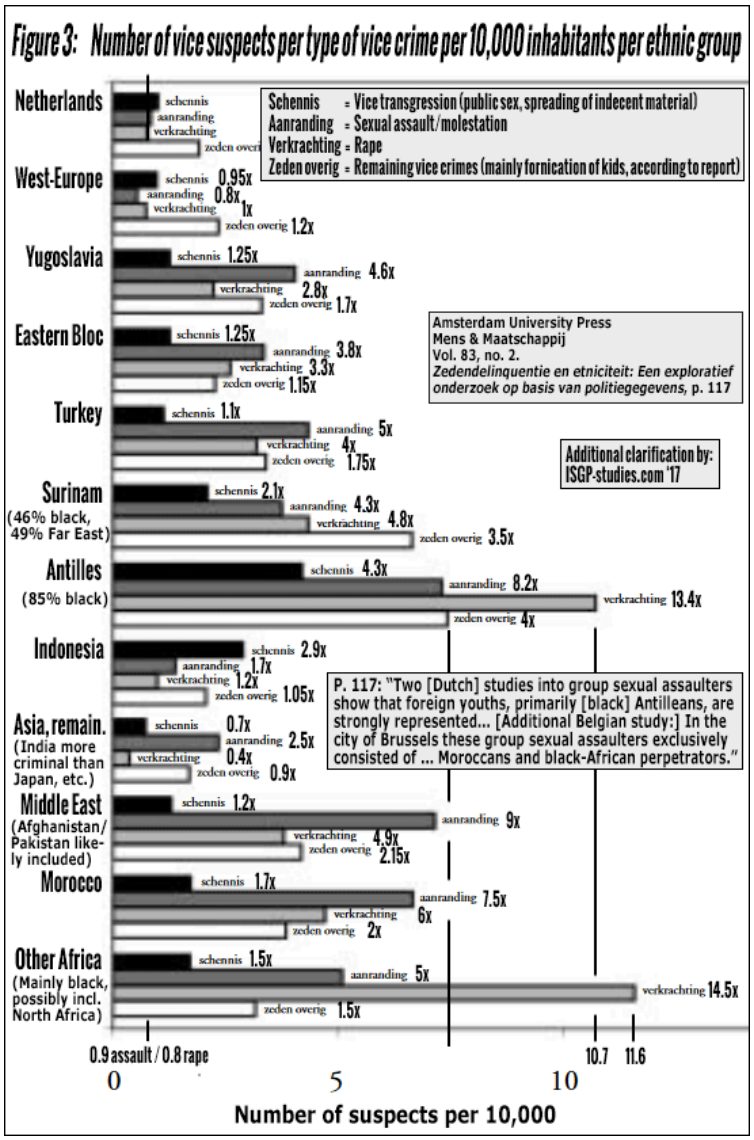
Crime numbers on Dutch blacks and Arabs

- Also in the Netherlands there is a long history of suppressing immigrant crime numbers. One example is a prominent 2010 study based on police records in which it was claimed that immigrant groups as Turks, Moroccans, Antilleans and Surinams on average have 2 to 2.5x the crime numbers of Dutch white natives. [59] To anyone with a pair of eyeballs who lives in the big city, this simply doesn't make any sense. One obvious weakness of the study was that it didn't look at the type of crimes committed or repeat offenders (there's a big difference between tax evasion and group rape in the streets). So let's look at some other numbers, as far as they are available or can be deduced.

- A 2008 study based on police data analyzed by Mens & Maatschappij magazine (Amsterdam University Press-published) that uses the exact same method of looking at all types of crime per ethnicity per 10,000 already gives us: Moroccans: 3.7x overrepresented, (45% black) Surinams: 3.5x and (85% black) Antilleans: 5x. As expected, Far East Asians at 1.1x and other West-Europeans at 1.2x have much lower crime numbers, making immigration from these areas considerably less of an ordeal. Most surprisingly is the relatively low number of 2.5x crime overrepresentation for Turkey, the Middle East and Africa (the latter of which there weren't many in 2008).

Luckily, the same report also focuses on sex crimes, singling out, among other things, sexual assault and full-on rape. All of a sudden we see MUCH higher representation among Arabs and Black Africans compared to Westerners and Asians, up to 14.5x for "Other Africa" in cases of rape. [60] We also see the familiar pattern of Arabs sticking to sexual assault while blacks are hugely overrepresented in the most violent category: rape. The numbers are even worse than seen here, because, as reported on page 117 of this report, group

assault and group rape out there in clubs and on the street is only done by Arabs and blacks. And the report doesn't mention the primary victim group: white girls.



- In January 2024 a small study of 15 finalized police dossiers with 32 perpetrators with regard to "sexual exploitation" was published by Stevig.nl, a Dutch NGO for youths with mental and psychological handicaps. The Dutch Ministery of Justice and Security helped with funding and selecting cases. It's a small study, and one wonders what the chances are of having included a case involving the controversial (white) No Surrender motorcycle club, but it nevertheless is a relevant study. Considerably underplayed in the study is that 90% of the perpetrators of sexual exploitation in the Netherlands have a "migration background", with some (predictable) mentions of black, Moroccan, Turkish and East Block perpetrators:

  "Migration background in almost 90 percent. ... Nationality: - [Formal] Dutch nationality [with migrant background], in some

> *cases it [purely] was: - Bulgarian... Curacao ... Turkish ... dual nationality (Dutch and Moroccan). ... Dominant due to culture from father (men are the boss). ... It is striking that the vast majority of perpetrators have a migration background. A factual and demonstrable fact. Stigmatization is lurking here, which is undesirable in our opinion. ... Perpetrators see women as inferior and subordinate to men. ...*
>
> *"Contacts with OMG (outlaw motorcycle gang) No Surrender. ... Sell to No Surrender Motorcycle Club. ...*
>
> *"85 percent have a criminal past. 15 percent are 'first offenders'. [Usually] criminal at a very young age. [Mostly] no education. [Or] special education. [Or] VMBO basic, MBO-niveau 4 in a single case."*[61]

The big question though is how much of an overrepresentation does this 90% represent? Let's see if we can roughly figure this out. Four nationalities are mentioned: one of them is from the East Block, which falls under "western immigrant", according to Central Bureau of Statistics (CBS) guidelines. [62] This would lead to an estimate that 68% of perpetrators had a "non-western immigrant" background. The vast majority of these would involve blacks and Arabs. Maybe there's a Latin American, (relatively low crime) Molukker/Indonesian, or some other nationality in there, so let's estimate 55% black and Arab immigrant perpetrators.

According to the report, most of the perpetrators involve young people, mainly in the ages 24 to 28, with prior convictions. A look at a CBS chart, shows that in 2022 a whopping 19% (almost 1 in 5) of all youths in the Netherlands up to the age of 25 has a "non-western" background, of which:

- **"Traditional" groups (50.3%):** Moroccan: 18.3%, Turkish (15.1%), Surinam (9.7%), Antillen (7.2%).
- **"Other" or "new" groups (49.7%):** mainly Syrian, Afghanistan, Iran and Iraq. [63]

Add the "third generation", which is counted "Dutch" by the CBS [64], and we probably are at 20% instead of 19%. But let's not include the third generation, because that is not how the CBS, or this crime report, classifies things. Also, let's lower the percentage of non-western immigrant youths from 19% to 15%, because it is clear that some of these cases already are quite a few years old, and on top of that some of the perpetrators are above the age of 25.

> Ok, so we have an estimated 55% of cases of "sexual exploitation" carried out by an estimated 15% of the (youthful) population: blacks and Arabs. This contrasts with 10% of cases of "sexual exploitation" carried out by an estimated 76% of the (youthful) population: native Dutch whites. **So you have a 5.07x smaller population committing 5.5x more crime. That puts us at a 28x higher crime rate for "sexual exploitation" for blacks and Arabs than native Dutch whites.**
>
> In all fairness, that's an acceptably conservative number. It could well be slightly above 30x. Even if you give it a 4x smaller population and 4x more crime (40% of cases), which is starting to get very questionably low in terms of estimates, you would still be looking at blacks and Arabs being 16x overrepresented in cases of "sexual exploitation" compared to native Dutch whites. Compared to London gang rape numbers of 17x higher for Arabs and 32x higher for blacks, 25x would sit right in the middle. "Sexual exploitation" is not gang rape though, and in Sweden we see immigrant rape (also "sexual molestation" there quickly is listed as rape) apparently 42x higher than native white Swedes, so an estimate of 28x really is not out of line.

Proceeding with a more general discussion: a bit disconcerting with these numbers is that back in 2013 it was reported in the Dutch media that only 11 percent of vice crimes are reported to the police and 3 percent of rapes lead to the actual filing of charges, with the vice crimes squad actively discouraging victims to file charges to prevent additional trauma. In 2012 there were 1297 rape victims who went on to press charges (3-4 per day), meaning there were an estimated 43,233 rape cases overall (118 per day). [65]

Wouldn't it be fascinating to have a look at the raw reports of all these cases and get a glimpse of what actually is going on in our society? Because, judging from the media, rape is extremely rare. Maybe 1 or 2 times a year a street assault is reported, usually without mentioning ethnicities. Although, in August 2018 such an apparently rare combined rape plus manslaughter was reported, with the media being very adament to report that the victim involved an *"international student from Indonesia"* even though *"the police ... can't confirm this information for privacy reasons."* [66] Meanwhile, the media, and probably the police, as usual, were fully silent on the ethnicity of the perpetrator. Mind you, most people overlook that Indonesia is 87% Muslim.

- In the Netherlands, in 2013, the total number of prisoners was 42,470. **Of this number, 62.8% was foreign**. Apart from Moroccans (10.6%) and Turks (4.9%), half-black people from **Surinam** (9.7%) and almost fully-black **from the Antilles** (8.3%), all traditional immigration groups, make up large numbers.[67]

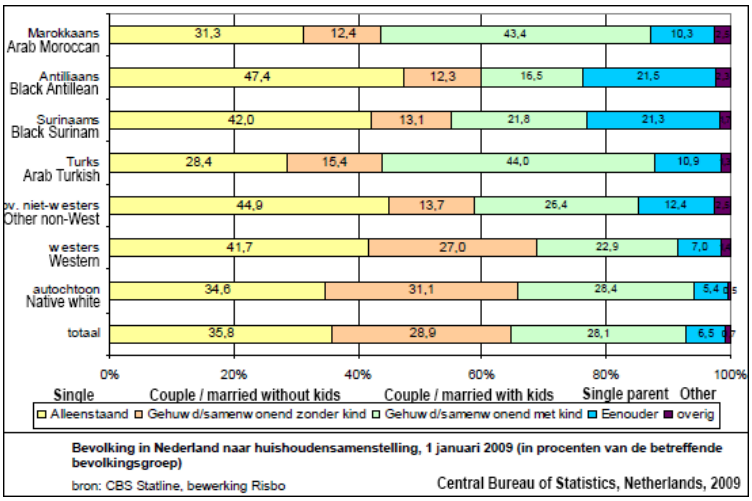
  Let's see if we can distill more relevant data from that. The Netherlands counts 16 million inhabitants. Of these, around 2013, roughly 13,300,000 were native white (83%), 141,000 were Antilleans (0.88%), 340,000 were Surinams (2.1% - 25% of all Surinams live in the Netherlands), 370,000 were Moroccans (2.3%) and 395,000 were Turks (2.5%).

  That gives us the following data for 2013, which - once again - most Dutch natives will find much more recognizable than the official, widely disseminated numbers of 2 to 2.5x:

	Origin	% pop. jailed	Same	Crime level above white
	Antilleans:	**2.5%**	**1 in 40**	**21x** (85% black gene)
	Surinams:	**1.2%**	**1 in 83**	**10x** (45% black gene)
	Moroccans:	0.9%	1 in 110	7.6x
	Turks:	0.53%	1 in 190	4.4x
	White:	0.12%	1 in 833	1.0x

- Data from the Netherlands reveals that Antilleans and Surinams, **the two most dominant black groups in the Netherlands, are four times more often a single parent than native whites**. In addition, only 1 in 4 Antilleans - by the far the most black group - are living together and only 1 in 3 Surinams compared to 2 in 3 Dutch people. After repeatedly observing the almost total and complete lack of family structure among blacks (noted below), I personally was rather relieved to come across this statistic. Once again this issue is not something that is discussed in the national media.

  Native white Dutch have a decent amount of singles, only slightly more than Arab Muslim groups (who have a ton of arranged marriages, with women having few rights), but at the same time they are the least likely of any group to be a single parent. In other words, it appears they are doing much better than all immigrant groups.



- Living in one of the (now) immigrant-dominated districts in Rotterdam, over the years I've gotten used to seeing African and Caribbean blacks:

    - hang out in large groups of adult men on street corners during the day and night;
    - buy stuff at (much more expensive) night stores en masse, even though they have no money;
    - not display any kind of traditional family structure;
    - have children that, more than any other ethnicity, have trouble focusing in school, with both boys and girls (very unruly and unusually unsupportive towards each other, also when compared to white or Asian children of similarly low socio-economic status);
    - have children that often do not respect white authority, whether white stepmothers (neighbor's black 13-year-old kid calls his white stepmom (black father left) a "cancer whore", physically attacks her, and regularly tells her he'll kill her) or people in the street trying to correct their behavior;
    - have children that gang up on white kids in the street out of racist motives;
    - eat extensive meals while sitting in public transportation (forbidden), only to open the door or window to dump their left-overs onto the street;
    - smoke weed in public transportation, mainly the metro, stinking up the entire wagon;
    - loudly converse about sexual acts at pavement cafes or restaurants;
    - keep 100 families awake all night with garden parties, with the police too overworked and demotivated to even show up after 8+ hours of this;
    - structurally (and loudly) converse through open windows all hours of the day and night without bothering to use doors - or even install doorbells.

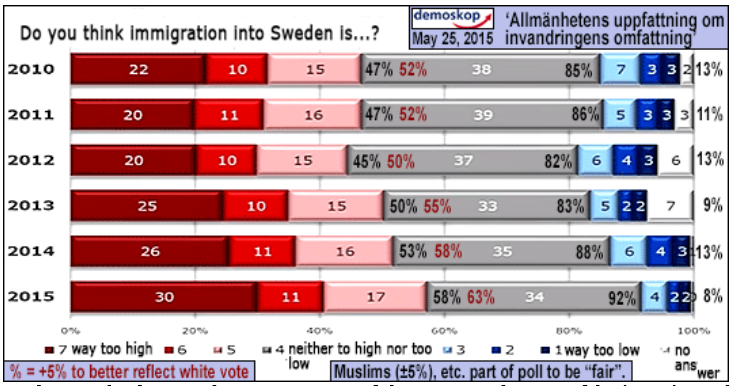
- scream and yell as loud at 3 o'clock at night as they do at 3 o'clock in the afternoon;
- harass random attractive (white) women - as young as 14 years old - who go over street without male company and with whom they stand no chance;
- very visibly lick their lips at random attractive (white) girls;
- blast their African/Caribbean gangster rap on their phones in crowded places, even in public transportation, similar to the old school boomboxes (now native teenagers are also starting to do it everywhere);
- continually blast gangster rap from their cars with giant subwoofers and open windows, to the point you often hear the music at 50 decibels inside your well-isolated home (you seldom hear Dutch, heavy metal, or "normal" music - only gangster rap, Islamo-Dutch rap, or reggaeton);
- use curse words to each other while employed in stores and surrounded by customers;
- ignore green lights with 10 cars behind them waiting, because they're talking to a friend in the street.

- Now, do I feel bad for black persons who behave? Maybe I do, maybe I don't. It's not relevant. Statistics and daily observations, which also can be turned into statistical data, are.

Sweden's "rape crisis": Blacks, Arabs, Latinos

"Swedes have to be integrated into the new Sweden. The old Sweden isn't coming back. ... I can't figure out what Swedish culture is. I think that's sort of what makes so many Swedes jealous of immigrants. You have a culture, an identity, a history, something that binds you together. And what do we have? We have midsummers eve and "dorky" things like that."

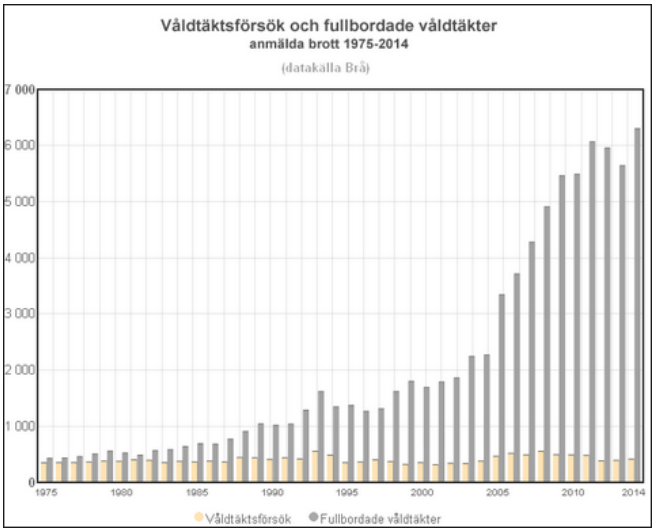
> Leading Swedish politician and Bilderberg visitor Mona Sahlin in 2001 and 2002 in relation to Muslim immigration. For sources and more bizarre quotes, go here.



Statistic showing that by 2015, despite mountains of elite propaganda, 58% of the (entire) population said there were too many Third World immigrants in Sweden. Those in the gray area are mostly just scared (which would bring the percentage to 92%) and intimidated to speak out, even anonymously. These numbers are similar to the Netherlands and other countries. The only ones with a completely different idea are politicians and CEOs with a Bilderberg alliance. Read some of their bizarre quotes here.

This article is primarily about presenting neutral, statistical information that cannot be discredited; personal experiences and individual cases are purposely limited. In case of Sweden, this is hard to do. A number of important statistics are available on this country, and these will be discussed at the end, but there also exists quite a bit of questionable information online about a number prominent rape cases in Sweden that needs to be countered somewhere. This article happens to be the best venue to do that, even more so because all these rape cases involve black Somali and Ethiopian perpetrators. For the most part, Somalis and Ethiopians are both black and Muslim, providing western civilization with the best of both worlds. Measured IQs in these countries average around 65.

In August 2016, I ran into statistics pushed by U.S. conservatives, including the neocon Gatestone Institute of former CIA director James Woolsey, showing vastly increased rape numbers in Sweden from 2005 and on. Of course, what these conservatives didn't tell their audiences is that Sweden widened its definition of rape in 2005, which came to include anyone victimized while under the influence of alcohol, drugs, or in an otherwise vulnerable state. Considering the immediate vertical rise of rapes in Sweden, it can safely be determined that this legislation had something to do with it. In 2008 and 2013 the definition of rape in Sweden was further expanded. A graph of the number of rapes in Sweden can be found below. The heading translates as "Attempted and actual rape":



Is this all there is to Sweden's "rape epidemic"? No, not exactly. The above graph reveals that the number of rapes in the Sweden increased roughly 600% between 1975 and 2004 and grew pretty darn steadily with the number of "guest workers" arriving in the country. Sweden accepted these immigrants earlier and in larger quantities than any other European country. It has also been a favorite destination of immigrants, because it's the only place in Europe where someone on social security could get a three bedroom apartment, at least until the recent past. In other words, it's not particularly unusual to see that crime in Sweden has increased the most among European countries. As already established in other sections of this article, Third World immigrants, and blacks in particular, bring with them huge increases in crime.

Unfortunately, with these little lies of omission, conservatives are actually aiding the liberals in covering up the immigrant crime problem in a very Machiavellian manner. Like clockwork, President Donald Trump did his part in February 2017 when at some point during a speech he stated:

> *"Look at what's happening last night in Sweden. Sweden, who would believe this? Sweden. They took in large numbers. They're having problems like they never thought possible."*

Check your facts, man. Nothing happened in Sweden that "last night", something the entire media gratefully made use of by painting Trump as a rambling, xenophobic schizophrenic. However, this is just the right-wing being the right-wing: they push endless streams of disinformation and fake news, whether that's about the Kennedy assassination, or 9/11, or now, apparently, also with Third World immigration even. Certainly they can and should do a much better job of gathering, organizing and publishing global immigrant crime statistics. The fact that Woolsey served as an advisor to the Trump campaign probably is no coincidence, nor the fact that Trump associates with top conspiracy disinformer Alex

Jones, or that both Trump and Jones tie all the way back to Barry Goldwater and the John Birch Society. None of the public's "favorite" anti-immigration political candidates have been or are independent: Donald Trump, Nigel Farage, Pim Fortuyn, Geert Wilders, the Le Pen family, etc. They all have questionable ties and/or display peculiar self-sabotaging behavior.

The same conservative manipulation can be spotted in a number of relatively prominent rape cases in Sweden involving native girls and immigrant men. Whoever types in "Swedish rape numbers" in a search engine or something along these lines will be confronted with a number of images that really are only pushed by Nazi, ultraconservative, and a handful of pro-Israel neoconservative sites - many of them exclusively in Swedish. Because the cases attached to these images are extremely obscure, with much of the information being poorly sourced, incomplete, untranslated, or blatantly incorrect, it might help to discuss here what these cases were about. While this article doesn't focus much on individual cases, stopping misinformation and disinformation is seldom a bad idea.

A first picture / meme that regularly comes up anno 2017 - if only because it is listed on the Snopes.com website - is one of a beautiful, young, blond, Swedish girl who claims to have been kidnapped and gang-raped for 17 hours by three refugees. The quote attributed to her includes, *"The police said the assault was my fault and the judge sentenced them all to probation. ... This took place last year, when I was 14."* The girl's name isn't provided with the meme, nor any kind of source, so it's not surprising to find out the whole case was made up. Fact check / debunking site Snopes.com dove on it like a vampire and exposed the image as a hoax in an article entitled *Swedish Girl Refugee Assault Meme*, concluding it represents *"a creative illustration of its creator's fear of refugees in Europe."* Always the same buzzwords: "hate", "fear", etc.

The Snopes article was written by Snopes.com author Kim LaCapria. A quick check on her Twitter reveals recent links to such articles as The Atlantic's *The Normalization of Conspiracy Culture: People who share dangerous ideas don't necessarily believe them*, which, of course, pretends Alex Jones and other conspiracy-inventing disinformers are not simply CIA assets. Despite being in the unique position to be self-reliant, Snopes is deeply involved in the "liberal CIA" network of George Soros and other foundations which spent tens of millions per year at least on pro-Third World immigration propaganda. Fact is, without also pointing people into the right direction on subjects as immigration, they're doing more damage than good. Of course, doing damage to credible-but-

sensitive facts is exactly what they're after. This site is not going to be discouraged though after the debunking of one fake photo.

A second picture that is easily found online involves the bloodied up face of a certain 18-year-old Linda. She's visible on the right. As it turns out, she and her friend Jenny Lemon, the one in the smaller picture, were assaulted by four Somali teens on New Year's Eve 2004/2005. They were on their way to a party in Stockholm, got lost, and then decided it would be a wise idea to follow this group of four Somali teens who claimed they knew where the party was. The second they entered a quiet area, the group hit the girls over the head with batons and dragged them off to the bushes. Linda pretended to be dead. This worked and thus only her friend Jenny was gang-raped naked on the ice cold winter ground by the men. After they were done, she was kicked in the stomach, but left alive. A glass bottle had shattered her eye socket. Both girls were robbed of their mobile phones and other belongings.

Top: Jenny Lemon and Linda. Bottom: Somali teens who assaulted them and raped Jenny on New Year's Eve 2004/2005 in Sweden.

DNA of one of the men was found inside Jenny and thus it was not too hard to apprehend the perpetrators and get them convicted. Lawyers of the defendants trying to make the case that she was drunk and had imagined things remain a little disturbing. [68]

Apparently both girls went on national television in 2005 and, with the encouragement of the national media, explained that this crime - of course! - had nothing to do with immigration, color of skin, culture, or anything else. In August 2010 Jenny even wrote an article for Expressen.se, one of two major tabloids in Sweden, in which she claimed the same thing. Jenny's words:

> *"I am afraid that the [Sweden Democrats'] report causes even more hatred and tension between different groups in society. That the events that my friend and I were subjected to are due to cultural differences, I do not believe for a second. I am convinced that we were subjected to something that is regarded equally despicable anywhere in the world. I do not think I'm the only rape victim in the statistics who thinks it feels awkward to be used as a weapon in the Sweden Democrats' election campaign.*
>
> *"When I additionally discover that my name is used in xenophobic hate campaigns online, I feel the same*

helplessness that I felt the terrible New Year's Eve that changed my life."[69]

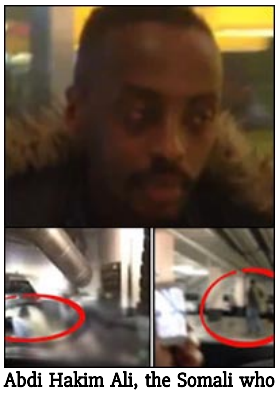
While it's not exactly fun to start an argument with someone who has been through her ordeal, Jenny allowed herself here to be used by Sweden's political and business establishment surrounding Bilderberg as a pro-Third World immigration tool. True, she hardly was given a choice. Generally both the conservative right and the liberal left manipulate any Third World immigration discussions and it's highly, highly unlikely that Expressen.se, pro-immigration (and anti-Trump) as it is, would have allowed her to write that article if she would have taken any stance even remotely critical of Third World immigration. The fact is, as this article demonstrates, African blacks in particular have vastly higher gang rape, murder and robbery numbers than native white populations. They're even higher than with Muslim Arabs, although in this case, the perpetrators are both.

Somewhat predictably, the man who raped Jenny (the others held her) was arrested again in November 2011 under a new name on charges that he had broken into the home of an 84-year-old woman and raped her. [70] In other words, he was out very quickly, he was never deported, and he didn't change his ways at all.

Immediately above another set of images can be found, the one on the right in particular is popping up a lot in Google when searching for keywords involving "Sweden", "rape" and "statistics". The woman in these pictures used to be the 27-year-old Elin Krantz. On September 27, 2010 she was followed out of a Swedish tram by the 23-year-old Ephrem Yohannes, an ethnic Somalian who used to live in the United States, where he compiled a significant criminal record, and then came to Sweden. After leaving the tram with her, Yohannes proceeded to rape and murder Krantz in a nearby park. While raping her, he called one of his friends, apparently in an effort to brag about the great time he was having - and maybe to ask him to come over. On the retrieved voicemail message, Krantz can be heard whimpering, with some reports mentioning that a second male voice was heard on the (deleted) recording. [71] Nevertheless, only Yohannes was tried and convicted, receiving a 16-year prison sentence. [72] With a little luck, he'll be out in his mid 30s, plenty young and healthy enough to make another victim. Initially I couldn't wrap my mind about the idea of Yohannes actually

calling up a buddy while raping and murdering a woman. That was until I compiled rape statistics for Africa. Those explain quite a bit.

Bizarrely, in the years prior to her death, Krantz was a member of the Facebook group "Vi Gillar Olika" ("We Like Diversity"), promoting Third World immigration into Sweden. While apparently maintaining sexual relations with men of immigrant backgrounds, the "alternative media" claim that she starred in a provocative "Mix it Up" ("Blanda Upp") video, in which she supposedly is singing the Swedish national anthem while riding a black guy, isn't true. As already observed here and there, clips of the video clearly show a different blond woman. The "Mix it Up" video by itself is utterly bizarre though and a product of Sweden's pro-Bilderberg establishment.



Abdi Hakim Ali, the Somali who raped a Swedish woman to death in 2013, two months after raping a homeless man in a shelter.

In recent years another picture has been showing up in relation to Swedish rape victims, in this case tied to the October 27, 2010 anal rape and murder of a woman by Swedish-Somali immigrant named Abdi Hakim Ali. The incident took place on the floor of a parking garage underneath the Sheraton Hotel in Vasagatan, Stockholm. Allegedly Ali found the woman - under the influence of alcohol, cocaine and barbiturates and possibly sick with pneumonia - on the floor here and decided it would be perfectly normal and great fun to stick his dick in her ass; more so than calling the authorities or taking care of the woman in a more conventional manner. One wonders how life-threatening her situation really was before Ali found her, but she died during the rape. This didn't impress Ali too much, as he continued to pound her lifeless body until the police could arrest him.

According to the phone call that went to the police informing them about this rape in a parking lot, two men were involved in the process. Pictures or video of the crime scene also reveal the presence of a second man. A second man indeed was arrested, but somehow not enough evidence could be found against this person to tie him to the rape and death of the woman.

The authorities decided against prosecuting Ali for murder, because there were *"no signs of external violence"* and thus in their eyes it couldn't be proved that he had actually caused the woman's death. [73] One wonders if she would be dead today if Ali had just called an ambulance or even simply had let her be. The stress of a 20-minute, involuntary, painful ass-pounding can easily send a very sick woman over the edge, right into her grave. Ali's testimony that the woman had consented to sex luckily were dismissed, and eventually he was sentenced to *"five years in prison for*

rape, theft, aggravated theft, attempted theft, shoplifting and violation of knife law." Apparently charges along the lines of Manslaughter or Wrongful Death didn't stick either. In addition, after a little too much media criticism, the prosecutor decided that all of a sudden it would be legally possible to deport Ali, albeit for no more than 10 years. [74] With sentences like these, one wonders if Ali has made his last rape or murder victim. In case of Ali, it was soon found out that just two months before his arrest of raping the supposedly unconscious woman, he had anally raped a sleeping homeless man in a night shelter. [75]

Apart from these three cases - Linda and Jenny in 2004, Elin Krantz in 2010 and the victim of Abdi Hakim Ali in 2013 - no pictures of alleged Swedish rape victims appear to be spreading across the propagandist and fake news-dominated underbelly of the internet.

Somali and Sierra Leone men arrested in April 2017 for gang raping a 15-year-old Swedish girl after she went to sleep at a party.

Other news reports of violent immigrant gang rapes in Sweden do exist. One example would be a June 19, 2014 case in which three young Iranians kidnapped and raped a girl. In the process they damaged the girl's vagina by using a gun to rape her that way as well. Eventually she managed to escape and was found by her father, who was looking for her. The perpetrators were convicted from 14 months to 5 years, meaning at least two are already back on the street. [76] April 2017 saw the strangulation and gang rape of a 15-year-old Swedish girl by three Africans in the 19 to 20-year-old range, one from Somalia, one from Sierra Leone and another from an unknown country. The men argued it was the fault of the girl, because she shouldn't have been spending the night alone at an apartment with men around. [77] Another case that should be mentioned is the one of Somalian Ibrahim Ahmed Dahir, who in December 2014 unbelievably violently beat (with a glass bottle) and raped in every possible way a Swedish woman who demanded he give back her stolen bicycle. Dahir had been convicted for rape a few years before as well, but could not be expelled *"because he was a Swedish citizen."* [78] As I find the original report on Friatider.se, I also spot new stories in the right column involving *"youngsters"* having tried to gang rape a 50-year-old woman before being scared off and "*a bunch of older guys on mopeds"* battering an 8-year-old girl and threatening to kill her. No nationalities are mentioned. Sweden is such a safe, wonderful place these days.

Unfortunately, in many, if not the vast majority of cases, the ethnic background of the perpetrators is left out of the media. Apart from a tiny handful of exceptions, neither national nor international media outlets take had an interest in reporting on these stories. In addition, for many years at this point the Swedish government has refused to publish any

statistical data that reveal these numbers. In January 2016, coincidentally two weeks after the prominent New Year's Eve immigrant rape epidemic in Germany [79], the Swedish government even banned its police services from providing any details to the media on the ethnic background of suspects. [80]

Luckily, it is possible to find an old study of the Swedish National Council for Crime Prevention (BRA) that looked at statistical crime differences between native Swedes, immigrants, and sometimes also the children of immigrants. The data goes all the way back to 1985-1989. The result were as follows:

Tabell 8. Promilleandel invandrare respektive svenskar som någon gång under perioden 1985–1989 registrerats för brott inom olika brottskategorier. Dessutom överrepresentationen samt ungefärligt osäkerhetsintervall för överrepresentationen.

ISGP-Studies.com note: Unlike many others statistics in the report, this one doesn't include the "invandrares barn" (children of immigrants) who most likely are labeled "Swedish", skewing statistics in favor of immigrants.

	Promilleandel		Överrepresentation	Uncertainty-interval
	Immigrant Invandrare	Swedish Svenskar	Överrepresentation	Osäkerhetsintervall
Samtliga brott **All crimes**	120	58	2,1	2,1–2,1
Brottsbalksbrott **Criminal offense**	93	42	2,2	2,2–2,2
Brott mot person **Crimes against person**	29	12	2,5	2,4–2,6
Stöldbrott **Theft**	53	22	2,4	2,4–2,4
Mord och dråp (inkl försök) **homicide (+ att.)**	0,7	0,2	3,5	3,0–4,1
Misshandel mot kvinna, obekant **Assault against women, unknown**	1,7	0,5	3,4	3,1–3,7
Misshandel mot kvinna, bekant **Assault against women, known**	7,6	–	–	–
Misshandel mot man, obekant **Assault against men, unknown**	8,0	2,0	4,0	3,8–4,2
Misshandel mot man, bekant **Assault against men, known**	6,1	2,4	2,5	2,4–2,7
Brott mot frihet och frid **Crimes against freedom and peace**	1	10	1,3 **0.1?!**	1,2–1,4
Våldtäkt **Rape**	0,9	0,2	4,5	4,0–5,1
Övriga sexualbrott **Other sex crimes**	0,2	0,1	2,0	1,4–2,7
Biltillgrepp (inkl. försök) **Car theft + attempt**	6,1	4,1	1,5	1,4–1,6
Stöld ur och från motorfordon **Motor vehicle theft**	4,7	3,5	1,3	1,2–1,4
Bostadsinbrott **Residential burglary**	4,7	1,2	3,9	3,7–4,1
Rån **Robbery**	2,0	0,7	2,9	2,7–3,2
Butiksstöld **Store theft**	3,6	1,0	3,5	3,4–3,6
Bedrägeri **Fraud**	15	6,9	2,2	2,1–1,8
Skadegörelse **Damage**	14	8,2	1,7	1,6–1,8
Rattfylleri **Drunk driving**	2	12	1,9 **0.2?!**	1,9–1,9
Övriga trafikbrott (TBL) **Other traffic offen.**	25	13	1,9	1,9–1,9
Narkotikabrott (NSL) **Drug offenses**	7,7	4,7	1,7	1,6–1,8

ISGP-studies.com '17

Swedish National Council for Crime Prevention (Brå) 1996, *Invandrares och invandrares brans brottslighet, p. 41*

Today Sweden has banned ethnic crime statistics, obfuscating the facts

Tellingly, rape scores the highest among immigrant crime numbers, followed by other major, often violent, crimes. The only thing stunning about the above statistics is that immigrants in that period in Sweden only produced on average 4 times the heavy crime numbers, possibly because the *"overrepresentation"* column doesn't multiply with the difference between native whites and these immigrant groups (10% Arab immigrants versus 75% whites, for example, would be: overrepresentation x 7.5). If you look at more modern prison population numbers from the Netherlands, we find 5.5x, 7.6x, 10x and 21x, respectively for Turks, Moroccans, Surinams and Antilleans. Turns out, due to the Swedish language, I missed a few aspects of the report. According to a 2015 Asia Times article describing this report, the final tallies were much closer to what we see in other countries:

> *"A new trend reached Sweden with full force over the past few decades: gang rape — virtually unknown before in*

> *Swedish criminal history. The number of gang rapes increased spectacularly between 1995 and 2006. Since then no studies of them have been undertaken. ...*
>
> *"A 1996 report by the Swedish National Council for Crime Prevention reached the conclusion that* ***immigrants from North Africa (Algeria, Libya, Morocco and Tunisia) were 23 times as likely to commit rape as Swedish men. The figures for men from Iraq, Bulgaria and Romania were, respectively, 20, 18 and 18. Men from the rest of Africa were 16 times more prone to commit rape; and men from Iran, Peru, Ecuador and Bolivia, 10 times as prone as Swedish men.*** *"*[81]

To be honest, while vastly higher than the 4.5x mentioned earlier in the report (which might include Far East Asians and Europeans from other countries), these numbers still look a little on the low side here and there, at least for Sub-Saharan Africa. The explanation for this might lie in the fact that very few men from southern Africa, where the rape crisis appears to be the worst (on the planet), make their voyage to Europe. It's hard to say.

The Asia Times article also talked about a second - and for now final - study on immigrant crime carried out in Sweden:

> *"Since 2000, there has only been one research report on immigrant crime. It was done in 2006 by Ann-Christine Hjelm from Karlstads University. It emerged that in 2002, 85% of those sentenced to at least two years in prison for rape in 2002 were foreign born or second-generation immigrants."*[82]

Remember the study of The Independent in London in the 2006-2009 period which concluded that 72% of gang rapists were black or mixed, 13% were Arab, with remaining 14% being white? That means Blacks and Arabs committed 85% of the gang rapes, which is very similar to the 85% immigrant rape number (apparently all rape) in Sweden just a few years earlier.

About 12% of Sweden's population was immigrant in 2012, so 5.67x higher rape crime rate, corrected for a 7.3x smaller immigrant population would mean a **rape rate among Swedish immigrants that is 42x higher than native white Swedes**. The overwhelming majority of these can be credited to blacks and Arabs. True, I'm not a mathematician and my math can easily be off, but even when we divide this by half the numbers are pretty much apocalyptic.

Unfortunately, the Asia Times article was written by economist David P. Goldman, a person who used to be an economic analyst for peculiar conspiracy promoter Lyndon LaRouche and his Executive Intelligence Review magazine. Granted, Goldman later also worked for the Reagan

administration, Credit Suisse, Bank of America, was published by the Wall Street Journal and Bloomberg Businessweek, and served as a columnist for Forbes from 1994 to 2001. It remains telling, however, that the writing of such a unique and important article has been delegated, once again, to a rather curious individual. It also makes one wonder why Goldman accepts the earlier-mentioned neocon Gatestone Institute as a credible source and why he doesn't explain that Sweden adapted its definition of rape in 2005. Gatestone certainly was six months earlier in describing these studies, so Goldman basically served as a conservative echo-chamber.

While trying to find an original copy of the study of Ann-Christine Hjelm [83], I ran into a very extensive January 11, 2017 rape report compiled by the nationalist Swedish Democrats party. [84] Based on no less than 32 very underreported studies into rape and immigration, it discusses the study of Ann-Christine Hjelm and then some. The study of Hjelm is discussed on page 10 of the report:

> *"**Hjelm, Anne-Christine (2006), calculates that 85% of those sentenced to at least two years in prison for rape by the Swedish Court of Appeal in 2002 were of foreign background.***
>
> *"Those who originated from the Middle East and North Africa stand out and accounts for at least 23% of rape cases, as well as Africa, excluding North Africa, accounting for at least 15% of rape cases. **Together, the Middle East and Africa thus represent at least 38% of rape cases. ... Since 22% of the rapists are of unknown, or confidential, non-Nordic, foreign background, the actual proportion of non-European rapists, or rapists originating in Africa or the Middle East, probably is considerably higher**. ...*
>
> *"South and Central America (7%) and Asia (7%) [represent at least 14%] of rape cases by foreign immigrants. ...*
>
> *"**Only 15% of the convicted offenders were of Swedish background.**"*

For a minute there I began to wonder if maybe Woolsey's Gatestone Institute and David Goldman had confused Hjelm's report based on 2002 numbers with the Swedish National Council for Crime Prevention based on 1985-1989 numbers. This turned out not to be the case. On page 20 we find the latter study discussed:

> *"0.2 percent of Swedes, excluding immigrant children, were reasonably suspected of rape in 1985-1989. This will be our default value from which we measure overrepresentation. The highest overrepresentation of rape crime broken down by country of birth in the table was:*

- *23-fold overrepresentation for ... Algeria, Morocco, Tunisia or Libya (4.6 percent).*
- *20-fold overrepresentation for ... Iraq (4.0 percent).*
- *18-fold overrepresentation for ... Bulgaria or Romania (3.6 percent).*
- *16.5-fold overrepresentation for the Africa category excluding North Africa and Uganda (3.3 percent).*
- *10-fold overrepresentation for ... Iran as well as ... Bolivia, Peru and Ecuador (2.0 percent).*"

In other words, in the 1985-1989 period:

- **1 in 500 Swedes was suspected of rape, while:**
- **1 in 22 North Africans was suspected of the same crime;**
- **1 in 25 Iraqis;**
- **1 in 28 Bulgarians and Romanians;**
- **1 in 30 Sub-Saharan Africans;**
- **1 in 50 Iranians and also:**
- **1 in 50 Latin Americans.**

The Swedish Democrats report lists a number of other interesting studies. On page 8 a 1991 study is mentioned that concluded that already back in 1982 50% of all rapists in Sweden were foreigners. At this point only a tiny fraction of Swedish society consisted of Arab and African immigrants. Then, on page 9, we find a study very similar to a Dutch report in 2001 that quoted Arab and African immigrants as saying *"The white meat is available"*:

> ***"H Ceccato, V., (2014) calculates that over 66% of the [rape] suspects in Stockholm in 2008-2009 were foreign nationals and were characterized by being "ethnically different", while their average rape victims were characterized by being younger women of Swedish nationality."***

Of course, Hjelm in 2006 put this number at 85%, because only 15% of rape convicts in Sweden actually were Swedish. Ceccato appears to have excluded West-European immigrants and possibly also East-European ones. What you really want to know though is how often each ethnicity is groping and raping kids, girls and women at parks, back-alleys and swimming pools when parents, friends, boyfriends and husbands aren't looking - including cases of gang-molesting and raping. Percentages for Arabs and Africans that may stand at a combined 50 to 70% for all rape cases may well go up to 90% or more if you look at this last statistic. The numbers that we have until here, however, are still a pretty good indication, however.

Some of the other studies that are listed in the Swedish Democrats' report draw somewhat more mild conclusions, providing overrepresentation of immigrants among rape cases as low as between 1.5 to 5 times. They

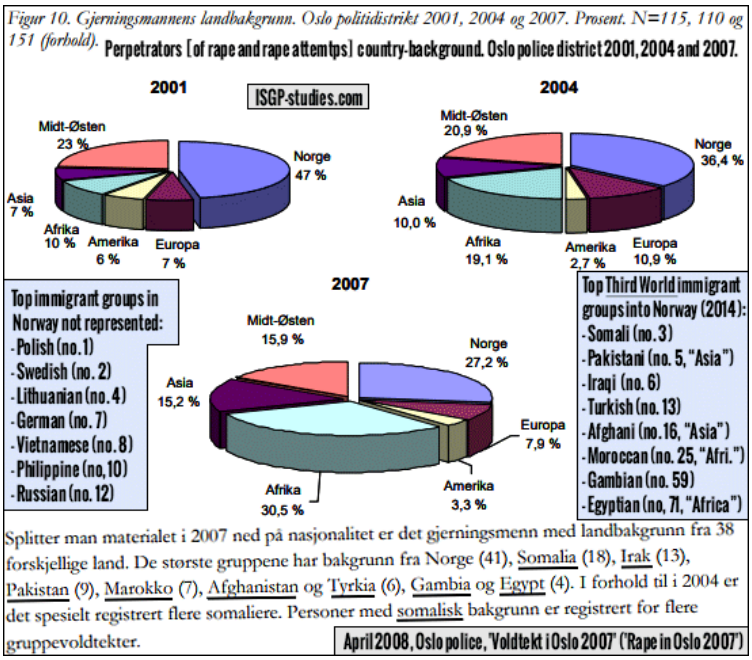
remind one of widely-published conclusions in the Netherlands "revealing" that black and Arab immigrants only are 2 to 2.5 times more often involved in crime than natives. Than, when you look deeper and do your own math, you find out that these groups can be found in jail 5 to more than 20 times more often - which is making a lot more sense. Picking flowers where you're not supposed to and a murderous gang-rape shouldn't fall in the same category, but that's exactly what was done with this prominent Dutch study. So who really knows about the reliability of some of the other Swedish studies.

For the rest, the situation in Sweden surrounding Third World immigrants is very remiscant of the Netherlands and other European countries. In a very balanced article of the National Review, which actually criticized the Washington Post for writing the bold-faced lie that "by and large, integration has been a success story [in Sweden]" wrote:

> *"At outdoor festivals such as "We Are Stockholm," women have been groped. Public swimming pools have become venues for gangs of young immigrant men to harass women. Malmö has been losing its small Jewish population, and the Simon Wiesenthal Center issued a travel warning due to threats and attacks on Jews from Muslim immigrants."*[85]

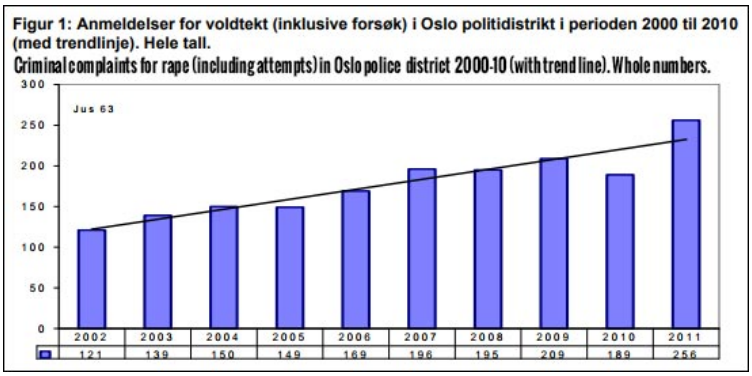
Norway's "rape crisis": Blacks and Arabs

This section was only added months after the Swedish one was finished, and only after a lot of digging through Norwegian news articles and police report. By far the most telling statistics are included on pages 19 and 20 in an obscure April 2008 Oslo police report entitled *Voldtekt i Oslo 2007* (*Rape in Oslo 2007*). These statistics are unique and important for a number of reasons. First, they demonstrate how in just 6 years Africans grew from 10% of the total number of rapes in the capital to a whopping 31%, with a corresponding percentual decline in ethnic Norwegians. Secondly, the report - rather uniquely - spells out the exact countries from which the largest number of rapists come from. They are all the usual suspects, including recently arrived black Somalians and Gambians.



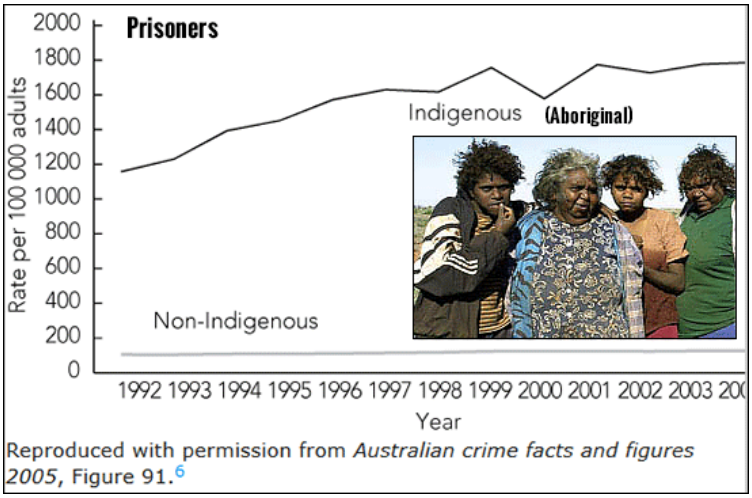
Keep in mind, Afghanistan and Pakistan fall under "Asia" while Morocco and Egypt fall under "Africa". Another thing to keep in mind is that even by 2014 only 35,000 Somalis were in the country on a population of just over 5 million (0.7%) and with that formed the third largest immigrant group, far behind the Poles and Swedes who don't show up in these statistics.

Later, somewhat less controversial Oslo police statistics additionally reveal a clear and continuing uptrend in annual rape numbers, all of it coinciding with the number of Third World immigrants arriving in Norway.



About 95% of violent street assaults and rape in Norway are carried out by blacks and Arabs. In contrast, roughly 70 to 80 percent of Norwegian rape victims are ethnic Norwegians. Thus it's no wonder that people here have been talking about a "rape crisis" since the turn of the century or so.

Crime numbers on Australian Aboriginals



Reproduced with permission from *Australian crime facts and figures 2005*, Figure 91.[6]

- It turns out to be next to impossible to find crime numbers on Aboriginals. Generally one can only find incarceration rates. That's unfortunate, because this can spun by extremists into being the result of racial profiling, despite the fact everyone in Australia is aware of the Aboriginal problem around train stations or tourist places as Alice Springs.

- August 2006, Medical Journal of Australia, 'Aboriginal incarceration: health and social impacts': *"Aboriginal prisoners currently represent 22% of the total Australian prisoner population. ... Although Australian incarceration rates overall are similar to rates in other industrialised nations, averaging 163 per 100,000 adult population in 2005, national age-standardised rates for Aboriginal prisoners of 1561 per 100,000 are at an unacceptable level and rising."*

- August 2006, Medical Journal of Australia, 'Aboriginal incarceration: health and social impacts': *"A recent study in NSW showed that nearly half of all the* ***young people in juvenile justice custody, 42% of whom are Aboriginal****, have a history of a parent in prison."*

- April 19, 2016, CCTV News, Asia Today, Greg Navarro from Sidney, YouTube title of CCTV: 'Aboriginal Australians: Aboriginals' high crime rate disproportionate': *"Well, I got to go back to that statistic you just gave, where you said* ***they account for about 25% of the indigenous population incarcerated or in prison****. What is even more startling about that is that indigenous Australians make up about* ***3% [2.7%] of the entire population*** *here."*

    - With an Australian prison population of 38,845 - with a max of 9,711 Aboriginals - and officially 606,164 Aboriginals in the country in 2016, that would come down to 1.6% of the entire

> Aboriginal population in jail at any one time. If we look to the Netherlands, Aboriginals sit between Surinams (1.2%) and the notorious Antilleans (2.5%) in terms of crime levels.

- August 2006, Medical Journal of Australia, 'Aboriginal incarceration: health and social impacts': *"In SA, close to 60% of metropolitan Aboriginal prisoners are positive for hepatitis C virus (HCV) antibodies."* To compare, the rate here in the Netherlands, even with large numbers of immigrants, sits at 0.2%.

Crime numbers on Brazilian blacks

June 5, 2015, Buenos Aires Herald, 'Young black men dominate Brazil's crowded prisons':

> *"With respect to the race, for white citizens, there are 191 inmates every 100,000 in 2012, while for blacks, there are 292 inmates for every 100,000."*

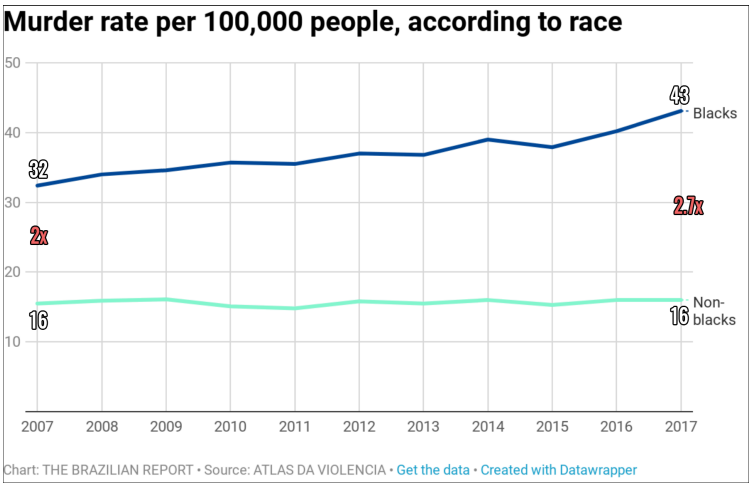
That's a 53% overrepresentation for black people - very low compared to western countries. The answer, of course, here is that Mestizos - mixes of white and American Indian genes that are to be found all over Latin America - are considered "white", and all to often "self-declare" as "white". Generally, the more Native American in descent, the higher the crime numbers.

Overall, media reports on crime in Brazil only talk about "black victims", clearly insinuating that police repression is a significant, or even dominant factor, in black crime in Brazil. This position is questionable at best.

Apparently 61% of all rape victims in Brazil are black women [86], which would be interesting considering only 7.8% of Brazilians classify as "Afro-Brazilians" and, looking at the United States, most crime tends to be black-on-black. So unless white and brown races en masse seek out black women to rape, rape culture also permeates Brazilian black society.

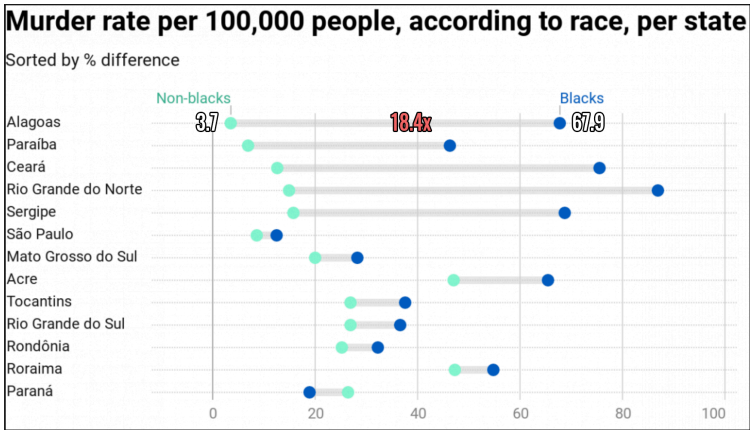
However, Brazil, which in addition consists of 62.5% "brown" inhabitants (so about 70% black and brown), overall has a huge institutional gang rape problem. Rape and gang rape of women is seen as relatively normal. A 2016 case in which 33 men of mixed black, brown and white descent raped a 16-year-old girl before posting a video of it on Twitter is good example of this, as are comments by prominent actors and politicians that in the West would have immediately ended their career, but in Brazil hardly made a dent in their popularity. [87]

The above part in this section is what was found in 2016. Only in 2023 did this author find out that you can get some black versus non-black murder rate statistic from the Brazilian government's 'Atlas de Violenca' database. [88] All that we appear to be seeing here though, once again, is murder *victims*, which doesn't really tell us much. As could roughly be expected, black people are murdered at 2 to 2.7 times the rate as "non-black" people.

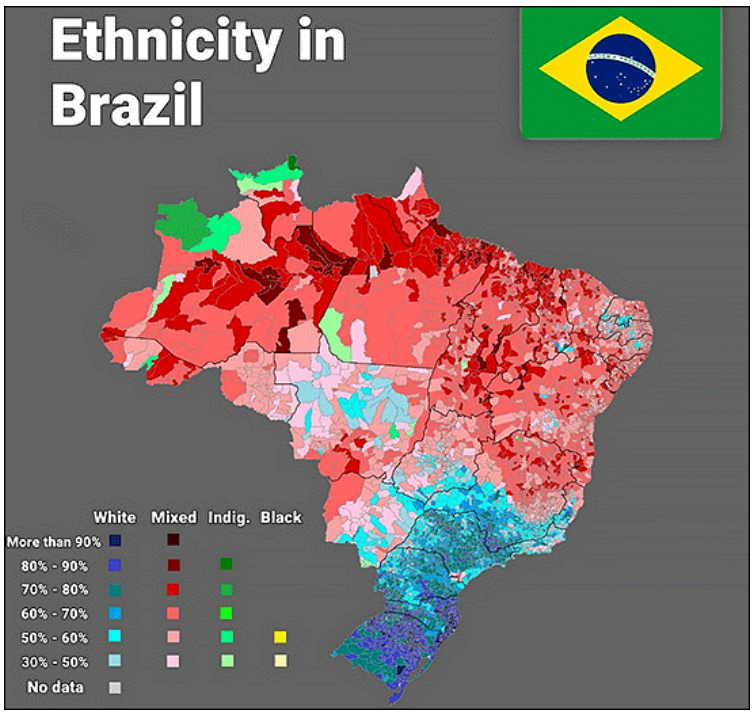


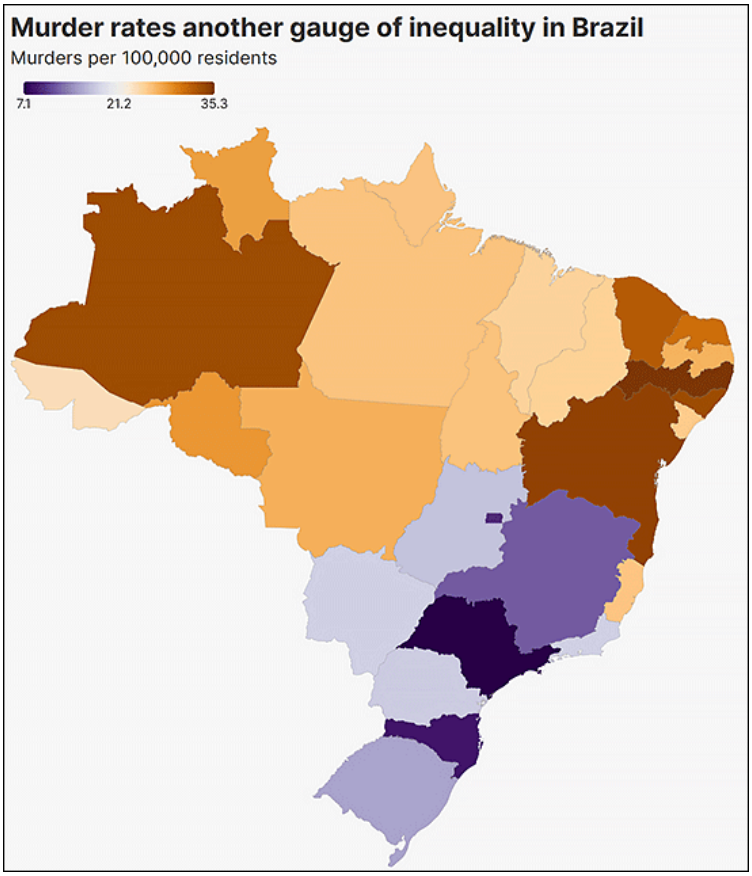
The real questions, of course, is, who is doing the murdering? Earlier-discussed statistics from the United States show that black-on-black murder is 5.5x higher than white-on-white, although black-on-white murder is 12x higher than in reverse. Looking at the street views from Rio to Porto Alegro, it is clear that the concept of a "white person" here is quite vague. All cities seem like "Indian country": lots of tiny, overweight, unattractive people with leather skins. It's quite different from the image you get from Brazilian TV, where see predominantly you "white" and almost white" people, these days forcibly mixed with some black people. You don't see many "native Indians". Also from the U.S. we learn that Latino's have 3.5x the crime numbers in general compared to whites, so you'd expect that 5.5x number to roughly halve - which is what we see.

So is there anything useful we can say about Brazilian crime? Very little. In Sao Paulo - with 61.9% whites, 25.5% Africans and 11.6% Native Americans anno 2013 - black people only are killed at 20% the rate per 100,000. In Alagoas, a state in the north with roughly comparable ethnic numbers - 53.7% white, 26.6% African and 18.7% Amerindian people - black people were murdered at a rate of 1700% of "non blacks." What's going on? Impossible to say from such a long distance and as a non-Portuguese speaker.

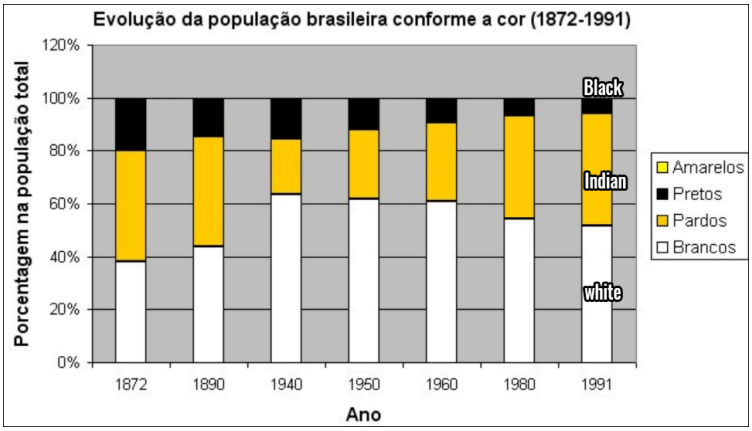


For the time being, Brazil remains a lost cause. Not just do people underreport Native American genes by a whole lot (explaining the country's lack of high-tech development), also proper statistics on ethnic crime seem to be missing. At least by comparing ethnicity versus murder rate maps, we find that murder is 4-5x more common in states with the least amount whites compared to the most amount of whites. Or shall we say, "whites"?





In 2019, Jair Bolsonaro came in as president on a "racist" agenda of stopping crime. Fact is, it seems quite obvious which populations need to be removed in order to make the south all "deep purple" in the map above. In that sense it is not good that in 2011 Brazil formally dropped below 50% white. [89] On the other hand, for the time being the black population is on the percentual decrease as well, and, as said repeatedly, Brazil is far less white than official statistics show. It's unlikely to ever have traditional Norwegian crime statistics.



Sub-Saharan Africa: cradle of gang rape non-civilization

Small picture: Hannah Cornelius, South African model and student who on May 26, 2017 was pulled from her car, kidnapped, and subsequently raped, stabbed and strangled to death by four black men. Her boyfriend was almost beaten to death with bricks.

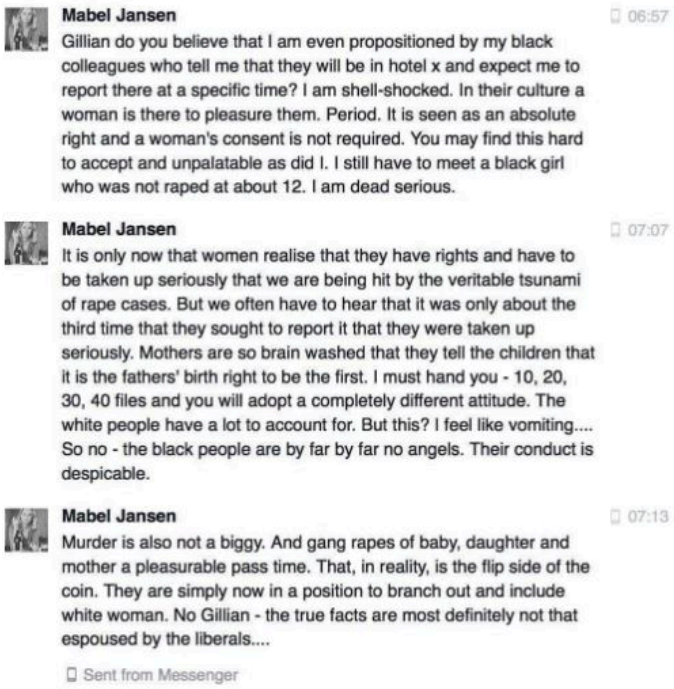
- Overall, Latin American countries high in American Indian genes and black-dominated countries have the highest homicide rates in the world. However, Sub-Saharan Africa deserves special mention for its institutional rape culture. South Africa is the worst, but many countries in this region are not far behind. Not only are vast amounts of women raped and gang raped, it will often also lead to ostracization from the community. Even husbands will throw wives out onto the street if they find out they were raped. Speaking of husbands, in much of Africa they rape their wives all the time. Women are not allowed to protest, even when their husbands are HIV positive. As in Muslim countries, women simply have nothing to say.

- June 18, 2009, BBC, 'South African rape survey shock': *"**One in four [27.6%] South African men questioned in a survey said they had raped someone**, and nearly half of them admitted more than one attack. The study, by the country's Medical Research Council, also found three out of four who admitted rape had attacked for the first time during their teens. It said practices such as gang rape were common because they were considered a form of male bonding."*

- September 27, 2013, Zimbabwe Independent, 'Rape is an African problem': *"South Africa's Medical Research Council in 2009 which found that more than a quarter of South African men — 27,6% – admitted that they had committed rape. Almost half of those men had raped two or three women or girls. One in 13 had raped at least 10 victims. ...*
  The researchers chose six countries in the Asia-Pacific region: China, Cambodia, Bangladesh, Sri Lanka, Indonesia and Papua New Guinea. ... In most of the Asian countries involved in the study, between 2 and 4% of the men interviewed said that they had raped a "non-partner" woman. That falls into the same range that prevails, one suspects, in most developed countries (although their reported cases of rape are much lower). ... [Only] Papua New Guinea [with coincidentally very Africa-looking natives] was right up there with

South Africa: 26,6% of the men interviewed had committed "single perpetrator rape" of a non-partner woman."

- May 12, 2016, Washington Post (super pro-establishment and thus anti-"racism"), 'Rape is black people's 'pastime,' white **South African** judge says in Facebook rant' (Facebook comments in article reproduced here):



Mabel Jansen 06:57
Gillian do you believe that I am even propositioned by my black colleagues who tell me that they will be in hotel x and expect me to report there at a specific time? I am shell-shocked. In their culture a woman is there to pleasure them. Period. It is seen as an absolute right and a woman's consent is not required. You may find this hard to accept and unpalatable as did I. I still have to meet a black girl who was not raped at about 12. I am dead serious.

Mabel Jansen 07:07
It is only now that women realise that they have rights and have to be taken up seriously that we are being hit by the veritable tsunami of rape cases. But we often have to hear that it was only about the third time that they sought to report it that they were taken up seriously. Mothers are so brain washed that they tell the children that it is the fathers' birth right to be the first. I must hand you - 10, 20, 30, 40 files and you will adopt a completely different attitude. The white people have a lot to account for. But this? I feel like vomiting.... So no - the black people are by far by far no angels. Their conduct is despicable.

Mabel Jansen 07:13
Murder is also not a biggy. And gang rapes of baby, daughter and mother a pleasurable pass time. That, in reality, is the flip side of the coin. They are simply now in a position to branch out and include white woman. No Gillian - the true facts are most definitely not that espoused by the liberals....

Sent from Messenger

- July 4, 2013 (original apparently dates to 2000), Bomme Isago Association, 'Rape in Botswana: A National Shame': *"In South Africa a woman is raped every 35 seconds and one in two women will be raped in their lifetime. ... Police in South Africa have estimated that only one in 35 rapes is reported. ...*
  *Women in **Botswana** are beaten and raped by their male partners on a daily, if not hourly basis. ... About 60 percent of Botswana women have been a victim of gender violence in the last five years, a quarter have been multiple sufferers. ... Rape crisis counselors in Botswana believe that even fewer rapes are reported as many prefer to keep the crime a "family matter", so in fact this figure is likely to be much higher. ... In 1982 only 23 percent of reported rapes ended in a conviction. In 1997 this had fallen still further to 20 percent. ...*
  In the recent Women's Affairs survey 37 percent of interviewees had suffered a severe beating 1-5 times in 1998 at the hands of their male partner."

- May 22, 2002, Afrol News, 'Rape "a massive problem for **Namibia**"':
  "As many as 15,000 people a year [in a country with only about a million women] could however be victims of rape or attempted rape

because it is believed that that only about one in every 20 rapes is actually reported to the Police."

- July 4, 2016, CAJNewsAfrica.com, **'Zambia**: Domestic Violence, Rape Worryingly High in Zambia': *"It is reported 31 percent of girls and 30 percent of boys aged 13-15 in Zambia have been forced to have sex.*
  In another survey, 25 percent of women and 16 percent of men in Zambia reported they had intercourse before the legal age of 18 because they were threatened or forced.
  Zambia has one of the highest rates of child marriage in the world. Nearly one-fifth (17 percent) of girls in Zambia age 15-19 are married, and 65 percent are married by age 20."

- May 6, 2015, Reuters, '**Uganda**'s women, girls seek justice to halt sexual violence: rights group': *"Rape is the first sexual experience of almost a quarter of Ugandan women aged 15-49, and 39 percent of women in this age group have been subjected to sexual violence, according to Uganda's 2006 Demographic and Health Survey. ... "families tend to keep quiet either to protect their supposed honor..."*"

Countries sourced here are underlined in red.

- 2010, Caryn Neumann, 'Sexual Crime: A Reference Handbook', p. 78: *"HIV infection in **Zimbabwe** has reached endemic proportions, with infection estimates ranging from 25 to 33 percent. A woman who cannot say "no" to sex [which they can't] cannot refuse sex with her HIV-infected husband. The World Alliance of YMCAs has reported that 73 percent of Zimbabwean women report being forced to have sex with their partners with 69 percent of these women engaging in sexual relations with a man that they knew to be infected with a sexually transmitted disease."*

- November 9, 2009, The Guardian, 'Child rape epidemic in **Zimbabwe**': *"A single clinic in the capital, Harare, says it has treated nearly 30,000 girls and boys who were abused in the past four years [on a population of 13 million] - an average of 20 per day. ... The GCN's research indicates that on average a man can rape 250 children before his crimes become public knowledge."*

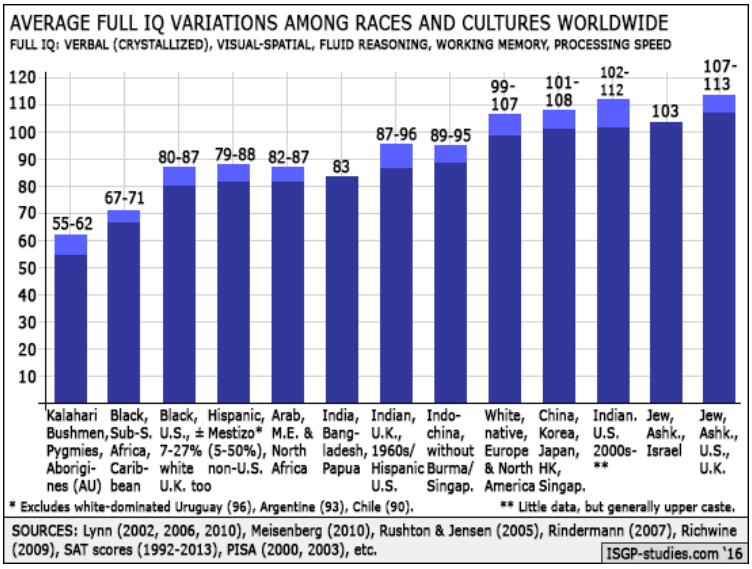
- July 18, 2014, IRINNews.org, 'Tackling **Liberia**'s high rape rate': *"Sexual violence against women is down from a high of 77 percent during wartime... Survey data from 2013 found that 19-26 percent of*

women and girls have reported having been raped by a stranger, and that 70-73 percent of married women have been sexually assaulted by their husbands... Many rape survivors are shunned by their family and may never marry. Others are forced to marry their rapist, as they are considered "damaged goods"."

- December 27, 2016, Daily Beast, 'Boko Haram Teaching Child Soldiers to Rape': *"**Nigeria** - ... The young boys, most of whom were about Ahmed's age, watched as their commanders raped women and young girls abducted in earlier raids. The lesson for the boys was clear: They were learning to subdue a struggling victim during sexual assault. ...*
  A report by Human Rights Watch (HRW) released in October detailed how women and girls who survived Boko Haram violence were [subsequently also] raped by officials at camps in northern Nigeria where they sought refuge. ... Many of these victims said they were abandoned after becoming pregnant.""

Genetic IQ issues

Evidence that black people do not exactly make the best citizens in western society actually extends beyond crime numbers and moves into something even more controversial and suppressed: black genetic IQ numbers, in particular with blacks that carry no white, Arab, or Asian genes.



Again, to me personally seeing these numbers and other evidence related to genetic IQ was an incredible relief really. All of a sudden, so much of the behavior of newly-arrived Caribbean and African blacks - which we're not supposed to talk about - began to make sense. Guess the masses are not delusional after all.

Do keep in mind, with the white-black IQ gap, we're primarily talking about reasoning and intellectual capacities; not about working memory or processing speed. In other words, black people are lacking the "nerd" capacities the white and Asian races have.

While it's entirely reasonable to be skeptical of this IQ gap, it is a fact that this gap exists, no matter what causes someone wants to attribute to it. It most certainly also explains a lot of the primitive interests and obsessions - sex, bling, partying, dancing, forming gangs - of many black people at the expense of just about anything else. It certainly explains why Africans (and the genetically related Aboriginals) are the only ones to have never developed any type of civilization beyond tribalism - or architecture beyond wooden huts. It explains why black people have never been able to acquire a Nobel prize for the sciences (not counting one in economics). It partly explains why they are so extremely underrepresented in the IT sector. [90] It explains the gigantic (gang) rape crisis of Africa and among immigrants who come here, apart from the overall crime numbers. It explains the (extreme) behavior of black neighbors that I had or the extreme unruliness of (groups of) black school children, even when compared to Muslim Moroccans of similar socio-economic status - all of which I used to work with as an intern in schools in various Rotterdam neighborhoods. It explains quite a few other things as well.

Slavery: the real facts

The transatlantic slavery system from West Africa's Gold Coast mainly to southern United States and Latin American plantations lasted from roughly 1502 to 1807, with the last illegal slave ship making it to Mobile, Alabama in 1859.

In recent years, largely due to secretive "liberal CIA" backing, it has become extremely common for so-called "anti-fascist" (antifa) groups in western society, in coordination with black activist groups as Black Lives Matter, to attack all symbols and remnants of the West's transatlantic slavery system. Even before that there have been lawsuits by black descendants of the slave trade against modern-day companies involved in that trade two centuries ago.

True, the circumstances in which slaves were held at forts as Elmina Castle and transported on slaver ships were horrific. Equally horrific was the killing off of unfit slaves who couldn't be sold in the New World. At the same time, it shouldn't be forgotten that:

- an estimated 70% of the West-African population lived in permanent servitute to other Africans, with large numbers of slaves being brought in from central African kingdoms to serve new African masters in western Africa [91];

- the vast majority of slaves were provided to western slave traders by local African leaders, who were selling their own slaves (more valuable than gold), obtained through war, specific raids, debt, birth right, or criminal conviction [92];
- Muslim societies were even longer involved in the African (and East-European) slave trade, and laid waste to tribes as Jomo Kenyatta\'s Kikuyu (which practiced female genital mutilation) - before the British colonialists arrived;
- countless empires in the history of the world have made use of slaves;
- the West, in no small part due to opposition from the lower classes, voluntary put a stop to the slavery system in the early 19th century;
- the British actively hunted slaver ships during much of the 19th century, the most successful ship in this effort being the HMS *Black Joke*;
- the British abolished widespread slavery among the African kingdoms as well, including among the Ashanti in Ghana and the Kingdom of Bonny in Nigeria, whose king was horrified by the ban. [93]
- governments and large corporations were running the slave trade, the same elements who so often made western children and adults work 16 hours per day, 6 to 7 days a week, under conditions that resulted in average age of death as low as 17 in certain mines and factories.
- black crime, low genetic IQ and racism is an increasingly heavy burden to western society.

If anything, the slave trade simply was part of the usual class warfare. Apart from large corporations owning cotton, rice, sugar and tobacco plantations in the south of the United States and Latin America, we find all too familiar banks and insurance companies (or their predecessors) as Lehman Brothers, JPMorganChase, New York Life, N.M. Rothschild & Sons, Brown Brothers Harriman, Barclays and AIG that were using slaves as collateral for loans. [94] Barings, HSBC [95] and Lloyds of London [96] have also been mentioned as banks that used to benefit from the slave trade.

If we are asked to pay reparations to black people over the slave trade, as so often is suggested by the extreme left, every society should basically be paying reparations to every other one. It makes no sense. It is a very immature way of getting even - beyond immediate needs - and will only result in continued animosity down the line. For example, overly excessive reparations for World War I stood at the basis of World War II. Since then, look at how the West, including Germany and Italy, and Japan in the East have come together. Today western people feel as bad about the slave trade as black people, but the slavery system implemented by their (robber baron) ancestors centuries back is as far

removed from them as it is for black people whose elite tribal leaders sold their African slaves to the western powers. Apologizing for "our" actions hundreds of years ago doesn't make even the slightest sense.

Then there is an additional issue: why give money to a race/culture with vastly higher crime numbers than native whites? What good is going to come from that? White culture, concerned as it is with human rights, literally is the only hope of blacks to survive and thrive through slow integration and problem solving on African issues. Blacks aren't particularly welcome in countries as Russia, China, or any Middle Eastern state. If any of these states would overtake the West as the predominant superpower, it's unlikely to spent much time trying to solve African overpopulation in any kind of bleeding heart manner.

Conclusions

Honestly, I cannot imagine a lot of people being shocked or surprised by these crime numbers, certainly not those who do not have to feel threatened by these facts. It's just another case of the media and political establishment hiding the obvious.

Instagram anno 2017 with a Dutch IP and before signing up to a large number of preferred channels (you still get them occasionally, even when not clicking on them): Zero Asian videos, but HUGE amounts of violent, nauseating black and Arab Muslim videos visible. These videos alone tell you something is wrong with Third Worlders. Black ghetto "humor" is also very easily recognizable for its wildly primitive sexual views. It's all about sexually dominating women - but taken a little too seriously.

Personally, liberal establishment mouthpieces can call me a racist all day long, considering this establishment itself is responsible for an enormous amount of stress among the native population, not to mention countless rapes, gang rapes, murders, or even traumatizing robberies of white citizens. We in the West - especially Europe - have to deal with at least three or four times the crime numbers (10 times or more in the big cities) that most of us should be exposed to, because our liberal Bilderberg-allied overlords have decided that "We, the people" have no need for the facts. And because of that, maybe any time any native white citizen is robbed, molested, raped, or injured by a Third World immigrant from a background with a severely heightened crime rate, they should complain to the press and sue the government.

An important question to ask maybe is: how can truth be a bad thing? In other words: how can knowledge about black IQ and crime numbers be a bad thing? It's not like race relations can get a whole lot worse. If anything, all the propaganda and immigration waves of the past few

years have made tensions even more unbearable. The immigration route we're walking is not working. We need a course correction. We need more sustainable policies. Not in the first place for the religious extremism and crime-ridden Third World, but for us, western civilization, the less criminal one, the more advanced one, the more civilized one, the more tolerant one. I mean, since when is it considered sound advice to not stand up for yourself? Especially when you're the adult surrounded by dysfunctional children? We may not be perfect, but this is exactly what the situation is. And the crime numbers prove it.

Notes

1. July 1, 2015, National Review, 'The Shameful Liberal Exploitation of the Charleston Massacre': *"Blacks, in other words, committed 85 percent of the non-homicide interracial crimes of violence between blacks and whites, even though they are less than 13 percent of the population."*

The provided Bureau of Justice Statistics statistic is included in the following article: July 1, 2015, National Review, 'The Shameful Liberal Exploitation of the Charleston Massacre: *"Blacks, in other words, committed 85 percent of the non-homicide interracial crimes of violence between blacks and whites, even though they are less than 13 percent of the population. ...*

    The formula for escaping poverty as an adult also has nothing to do with race: Graduate from high school, wait until you are married to have children, and work full-time. Whites who eschew those bourgeois behaviors are as likely to be poor as blacks who enschew them. Only 2 percent of individuals who follow those rules are in poverty, according to Isabel Sawhill of the Brookings Institution; 72 percent of those who follow them earn at least $55,000 a year. The American poverty rate would be cut by 70 percent if the same percentage of Americans engaged in those responsible behaviors as did in 1970, regardless of race."

Phillips Exeter Academy (most elite boarding school), 1988 – 1991."*

53. July 4, 2013, Daily Mail, 'More Americans feel that black people are more racist than whites and Hispanics, study finds': *"A new survey has found that more Americans see black people as racist than white people or even Hispanics. Thirty seven percent of American adults spoken to by respected pollsters Rasmussen think that African American citizens hold racist views, as opposed to just 15 percent of white Americans. Indeed, even the black adults the survey spoke to, 31 percent said they considered people of their own race to be racist while only 24-percent thought that white people were bigoted. ...*

However, on purely partisan lines, 49 percent of Republicans believe that black Americans are racist while only 29 percent of Democrats think that. Among independent voters, 36 percent think that black people in the U.S. are racist. ... Taken as a whole, the survey discovered that only 30 percent of people in the country see race relations as positive while 14 percent believe them to poor. But, almost 30 percent see that race relations are improving across the nation while 32 percent are worries that they are getting worse. The figures show that overall, the current attitude in the nation is receptive to improvement in race relations, with about 35 percent seeing neither progress nor regression. Indeed, black people are more optimistic about the current state of affairs than white people or Hispanic people - as are liberals, as opposed to conservatives."

54. May 15, 2012, Thomas Sowell of the Hoover Institution for The National Review, 'A Censored Race War: The media ignore racially motivated black-on-white crime': *"When two white newspaper reporters for the Virginian-Pilot were driving through Norfolk, and were set upon and beaten by a mob of young blacks — beaten so badly that they had to take a week off from work — that might sound like news that should have been reported, at least by their own newspaper. But it wasn't. The O'Reilly Factor on Fox News Channel was the first major television program to report this incident.*

Yet this story is not just a Norfolk story, either in what happened or in how the media and the authorities have tried to sweep it under the rug. Similar episodes of unprovoked violence by young black gangs against white people chosen at random on beaches, in shopping malls, or in other public places have occurred in

Philadelphia, New York, Denver, Chicago, Cleveland, Washington, Los Angeles, and other places across the country. Both the authorities and the media tend to try to sweep these episodes under the rug.

[Article goes on to mention examples]"

*) May 12, 2015, Breitbart, '50 'teens' beat white man to a pulp for asking brawling girls to get off his car': *"On April 22, Baltimore resident Richard Fletcher looked out his window and saw two teenage girls fighting - on top of his car. He went outside to ask them to take the fight elsewhere, and was then jumped by approximately 50 "teens" and beaten within an inch of his life. The attackers crushed his eye sockets and broke his nose, as well as several ribs. 61-year-old Fletcher is now out of the hospital but facing medical bills of $200,000 to 400,000. ... Police have since arrested 17-year-old Antoine Lawson, a 15-year-old girl, and three others in connection with the beating "and are hoping to bring all of the teens, who are believed to be students at Baltimore Community High School, that participated in the beating to justice." Lawson was charged with attempted murder. CBS Baltimore reports the [sic[Fletcher also suffered a "brain bleed" from the beating. Baltimore County Police Cpl. John Wachter said: "He was brutally attacked. He wasn't trying to intervene in their disagreement. He just wanted them to stop fighting and move away from his car."* An image of Fletcher is included. His head was a red swollen mass upon arriving in the hospital.

*) August 19, 2015, My Fox 28, 'Elderly Woman Robbed, Beaten at Church': *"Two young men are now wanted for robbing and beating a woman inside an Omaha church. The entire thing was caught on camera. The 76-year-old woman was inside [the church] on Sunday morning when the two teens snuck up behind her. One stole her purse. The other punched her in the back of the head, knocking her to the floor."* Not a word about the color, but the surveillance camera shows two black kids of about 15-years-old.

57. June 10, 2009, The Independent, 'Gang rape: Is it a race issue?' (carried out by a black man from Sierra Leone): *"In 2008 alone, [London's Metropolitan Police] received reports of 85 gang rapes. Using the Met's definition of gang rape – those involving three or more perpetrators – we began to look at the number of convictions. We tracked down 29 cases, from January 2006 to March 2009, in which a total of 92 young people were convicted of involvement in gang rape.*
    One fact stood out. Of those convicted, 66 were black or mixed race, 13 were white [14% of total] and the remainder [13] were from other countries including Afghanistan, Iraq and Libya."
58. June 26, 2010, Sunday Telegraph, 'Violent inner-city crime, the figures, and a question of race': *"The statistics, released by the Metropolitan Police, permit an informed debate on a sensitive subject for the first time. ...*
    They show that among those proceeded against for street crimes, 54 per cent were black; for robbery, 59 per cent; and for gun crimes, 67 per cent. Street crimes include muggings, assault with intent to rob and snatching property.
    Just over 12 per cent of London's 7.5 million population is black, including those of mixed black and white parentage, while 69 per cent is white, according to the Office for National Statistics."
59. June 26, 2010, NOS (premier Dutch evening news outlet), 'Helft Marokkaanse jongens in aanraking met politie': *"Meer dan de helft van de Marokkaanse jongens in Nederland is voor zijn 23ste in aanraking geweest met de politie. Dat blijkt uit onderzoek dat is geplaatst in het Tijdschrift voor Criminologie.*
    Onderzoekers hebben politiegegevens gebruikt van iedereen die in 1984 in Nederland is geboren. De onderzoekers maakten gebruik van het politiesysteem HKS. "De lichting van 1984 was de eerste groep van wie betrouwbare gegevens stonden in het systeem", zeggen de onderzoekers. In 1984 werden ruim 87.000 jongens geboren. Voor het onderzoek zijn ze gesplitst in de etnische groepen Nederlands, Surinaams, Antilliaans, Turks, Marokkaans en overig.
    Van de hele groep, jongens en meisje, had ruim 14 procent op 22-jarige leeftijd een misdrijf gepleegd. Bij Marokkaanse jongens ligt het percentage op 54 procent. Ook Surinaamse (43 procent) en Turkse jongens (41 procent) staan veel vaker in het politiesysteem dan gemiddeld. Autochtone Nederlandse jongens komen uit op ruim 20 procent. Verder blijkt uit de gegevens dat Turken veel geweldsmisdrijven plegen, Marokkanen vermogensdelicten en autochtone Nederlanders bekend staan om hun vernielingsgedrag en het verstoren van de openbare orde."

One figure stood out: African Americans, about 13 percent of the U.S. population, made up no more than 1 percent of technical employees at Google, Facebook, and other prominent Silicon Valley companies. This was at least partly because of the way companies recruited [from prominent universities and certainly not black universities]..."*
91. *) 1799, West-Africa explorer Mungo Park (who had to fend off attackers every other week or so on his travels), 'Travels in the Interior Districts of Africa', 'Chapter XXII: Observations concerning the State and Sources of Slavery in Africa': *"The slaves in Africa, I suppose, are nearly in the proportion of three to one to the freemen. They claim no reward for their services except food and clothing, and are treated with kindness or severity, according to the good or bad disposition of their masters...*
    These restrictions on the power of the master, extend not to the case of prisoners in war, not to that of slaves purchased with money. [These] have no right to the protection of the law, and may be treated with severity... There are, indeed, regular markets, where slaves of this description are bought and sold...
    When slaves are only a few days' journey from the place of their

nativity they frequently effect their escape; but when one or more kingdoms intervene, escape being more difficult [and] he has lost all hopes of returning to his native kingdom. The slaves which are purchased by the Europeans on the coast are chiefly of this description. A few of them are collected in the petty wars, hereafter to be described, which take place near the coast, but by far the greater number are brought down in large caravans from the inland countries, of which many are unknown, even by name, to the Europeans.

The slaves which are thus brought from the interior [of Africa] may be divided into two distinct classes – first, such as were slaves from their birth, having been born of enslaved mothers; secondly, such as were born free, but who afterwards, by whatever means, became slaves. Those of the first description are by far the most numerous..."

92. *) Ibid.

*) September 2001, BBC.com, 'The Story of Africa', 'African Slave Owners': *"In the early 18th century, Kings of Dahomey (known today as Benin) became big players in the slave trade, waging a bitter war on their neighbours, resulting in the capture of 10,000, including another important slave trader, the King of Whydah. King Tegbesu made £250,000 a year selling people into slavery in 1750. King Gezo said in the 1840's he would do anything the British wanted him to do apart from giving up slave trade... The ruling class of coastal Swahili society - Sultans, government officials and wealthy merchants - used non-Muslim slaves as domestic servants and to work on farms and estates. ... The Omani Sultan, Seyyid Said, became immensely rich when he started up cloves plantations in 1820 with slave labour - so successful was he that he moved the Omani capital to Zanzibar in 1840."*

*) Feb. 11, 2005, BBC, 'Born to be a slave in Niger': *"A Nigerian study has found that almost 8% of the population are slaves. You wonder how this can be in the 21st Century...*
